EDITORIALS

Variations in energy intake: it is more complicated than we think. YY Lam and E Ravussin
See corresponding article on page 1206.

When to eat! NV Dhurandhar and M Binks
See corresponding article on page 1213.

Salt substitution is a promising but unproven intervention for stroke management. B Neal and JHY Wu
See corresponding article on page 1267.

PERSPECTIVE

Surrogate disease markers as substitutes for chronic disease outcomes in studies of diet and chronic disease relations. EA Yetley et al

ORIGINAL RESEARCH COMMUNICATIONS

Obesity and eating disorders
Within-day protein distribution does not influence body composition responses during weight loss in resistance-training adults who are overweight. JL Hudson et al

No metabolic effects of mustard allyl-isothiocyanate compared with placebo in men. M Langeveld et al

Nutritional status, dietary intake, and body composition
Investigating predictors of eating: is resting metabolic rate really the strongest proxy of energy intake? J McNeil et al
See corresponding editorial on page 1169.

Later circadian timing of food intake is associated with increased body fat. AW McHill et al
See corresponding editorial on page 1171.

Time of day and eating behaviors are associated with the composition and function of the human gastrointestinal microbiota. JL Kaczmarek et al

Comparison of midupper arm circumference and weight-for-height z score for assessing acute malnutrition in Bangladeshi children aged 6-60 mo: an analytical study. Mt Hossain et al

Carbohydrate metabolism and diabetes
Plasma glucose and insulin responses after consumption of breakfasts with different sources of soluble fiber in type 2 diabetes patients: a randomized crossover clinical trial. CM de Carvalho et al

Effect of prior meal macronutrient composition on postprandial glycemic responses and glycemic index and glycemic load value determinations. H Meng et al

Energy and protein metabolism
In the elderly, meat protein assimilation from rare meat is lower than that from meat that is well done. C Buffière et al

Vitamins, minerals, and phytochemicals
Intake of potassium- and magnesium-enriched salt improves functional outcome after stroke: a randomized, multicenter, double-blind controlled trial. W-H Pan et al
See corresponding editorial on page 1173.

Growth, development, and pediatrics
Randomized controlled trial on the impact of early-life intervention with bifidobacteria on the healthy infant fecal microbiota and metabolome. M Bazanella et al

Cancer
Inflammatory potential of the diet and colorectal tumor risk in persons with Lynch syndrome. JGM Brouwer et al

Nutritional epidemiology and public health
Trajectories of maternal weight from before pregnancy through postpartum and associations with childhood obesity. SA Leonard et al

Biomarkers of food intake and nutrient status are associated with glucose tolerance status and development of type 2 diabetes in older Swedish women. O Savolainen et al

Cluster randomized controlled trial of a consumer behavior intervention to improve healthy food purchases from online canteens. T Delaney et al

Gene-nutrient interactions
Genetic variation of habitual coffee consumption and glycemic changes in response to weight-loss diet intervention: the Preventing Overweight Using Novel Dietary Strategies (POUNDS LOST) trial. L Han et al

ERRATA

The American Journal of Clinical Nutrition is a publication of the American Society for Nutrition. The Journal is published biannually with two volumes per year. The primary focus of the Journal is the publication of basic and clinical studies relevant to human nutrition. To read the Information for Authors or to submit a manuscript, please visit http://ajcn.nutrition.org.

All rights reserved. Trademarks registered, US Patent Office. Copyright © 2017 by the American Society for Nutrition. The contents of this publication may not be reproduced in whole or part without consent of the copyright owner. When an abstract appears at the beginning of an article, however, it may be reproduced or translated for noncommercial purposes without specific permission, provided the original citation is included. The table of contents and cover also may be reproduced or translated for noncommercial purposes without specific permission.

Statements made and opinions expressed in Original Research Communications, Letters to the Editor, Editorials, Book Reviews, and certain other special articles appearing in this Journal represent the views of the authors and do not necessarily reflect the position of the American Society for Nutrition.

Change of address, phone, fax, and e-mail: Fax changes to Turpin Distribution Services at (860) 350-0039 (Americas) or 44 (0) 1767 60 1640 (worldwide). Include the old address label or your customer ID.
