EDITORIALS

Weight-loss diets—can you keep it off?  I Shai and MJ Stampfer  See corresponding article on page 1232.  1185

Sufficient protein for our elders?  DJ Millward  See corresponding article on page 1322.  1187

How safe is fructose for persons with or without diabetes?  LG Sánchez-Lozada et al  See corresponding article on page 1419.  1189

PERSPECTIVE

Issues related to the conduct of systematic reviews: a focus on the nutrition field.  D Moher and AC Tricco  1191

ORIGINAL RESEARCH COMMUNICATIONS

Obesity and eating disorders

Physical activity is a confounding factor of the relation between eating frequency and body composition.  K Duval et al  1200

The combined relations of adiposity and smoking on mortality.  A Koster et al  1206

Cardiovascular disease risk

Adherence to healthy eating patterns is associated with higher circulating total and high-molecular-weight adiponectin and lower resistin concentrations in women from the Nurses’ Health Study.  JL Fargnoli et al  1213

Accumulating short bouts of brisk walking reduces postprandial plasma triacylglycerol concentrations and resting blood pressure in healthy young men.  M Miyashita et al  1225

Nutritional status, dietary intake, and body composition

Comparison of 3 ad libitum diets for weight-loss maintenance, risk of cardiovascular disease, and diabetes: a 6-mo randomized, controlled trial.  A Due et al  See corresponding editorial on page 1185.  1232

Weight loss improves the response of obese patients with moderate-to-severe chronic plaque psoriasis to low-dose cyclosporine therapy: a randomized, controlled, investigator-blinded clinical trial.  P Gisondi et al  1242

Dairy consumption and 6-y changes in body weight and waist circumference in middle-aged French adults.  A-C Vergnaud et al  1248

Using cereal to increase dietary fiber intake to the recommended level and the effect of fiber on bowel function in healthy persons consuming North American diets.  V Vuksan et al  1256

Visceral adiposity and its anatomical distribution as predictors of the metabolic syndrome and cardiometabolic risk factor levels.  EW Demerath et al  1263

Carbohydrate metabolism and diabetes

Use of modified cornstarch therapy to extend fasting in glycogen storage disease types Ia and Ib.  CE Correia et al  1272

Entero-insular axis and postprandial insulin differences in African American and European American children.  PB Higgins et al  1277

Energy and protein metabolism

Combined enteral infusion of glutamine, carbohydrates, and antioxidants modulates gut protein metabolism in humans.  M Coëffier et al  1284

Vitamins, minerals, and phytochemicals

Biotin accounts for less than half of all biotin and biotin metabolites in the cerebrospinal fluid of children.  A Bogusiewicz et al  1291

Cancer

A 22-y prospective study of fish intake in relation to prostate cancer incidence and mortality.  JE Chavarro et al  1297

Dietary fat and breast cancer risk in the European Prospective Investigation into Cancer and Nutrition.  S Sieri et al  1304

AIDS and other wasting syndromes

Evaluation of high-protein supplementation in weight-stable HIV-positive subjects with a history of weight loss: a randomized, double-blind, multicenter trial.  FR Sattler et al  1313

Aging

Dietary protein requirements of younger and older adults.  WW Campbell et al  See corresponding editorial on page 1187.  1322

Nutritional epidemiology and public health

Effects of maternal multiple micronutrient supplementation on fetal growth: a double-blind randomized controlled trial in rural Burkina Faso.  D Roberfroid et al  1330
