Outline specifications for Review Articles for Human Reproduction Update

The journal publishes peer reviewer papers from invited authors covering all area of basic, transitional and clinical topics related to reproduction.

Authors who would like to prepare a manuscript for Human Reproduction Update are required to submit a proposal for consideration by the Editor-in-Chief and Editorial Board. This proposal should be submitted by email (editorial@humanreproduction.co.uk) and include an abstract, a table of contents, keywords and a provisional submission date. Only manuscripts that have received approval through this process may be submitted.

Papers fulfilling the following criteria are sought:

- Reviews can be either comprehensive or systematic.
- Manuscripts should have a structured abstract of less than 500 words, 6000–10,000 words of text, 3–5 tables, 2–3 figures and 200–300 references.
- Manuscripts should be written using clear and concise English, with English standard spelling and conventions.

Detailed information regarding scope and instructions on the submission and formatting of articles can be obtained from https://academic.oup.com/humupd/pages/General
