Bioinformatics
VOLUME 34 NUMBER 9 MAY 1 2018

ORIGINAL PAPERS

Genome analysis
Integrating 5hmC and gene expression data to infer regulatory mechanisms
C.Mitrea, P.Wijesinghe, G.Dyson, A.Kruger, D.M.Ruden, S.Draghici and A.Bollig-Fischer

Sequence analysis
pLoc-mHum: predict subcellular localization of multi-location human proteins via general PseAAC to winnow out the crucial GO information
X.Cheng, X.Zhao and K.-C.Chou
Analyzing large scale genomic data on the cloud with SparkHit
L.Huang, J.Krüger and A.Sczyrba

STRUCTURAL BIOINFORMATICS

DNCON2: improved protein contact prediction using two-level deep convolutional neural networks
B.Abdulhatem, J.Hou and J.Cheng
Computational identification of binding energy hot spots in protein-RNA complexes using an ensemble approach
Y.Pan, Z.Wang, W.Zhan and L.Deng
Protein classification using modified n-grams and skip-grams
S.M.A.Islam, B.J.Heil, C.M.Kearney and E.J.Baker

APPLICATIONS NOTES

Outlier detection for improved differential splicing quantification from RNA-Seq experiments with replicates
S.Nicotra, J.A.Yu, S.Viswanagh, M.Tahara, G.R.Grant and Y.Barash

geneseq2ap: a computational tool for pathway-based rational drug repositioning

Matrix factorization-based data fusion for the prediction of IncRNA-disease associations
L.Zhang, Y.Wang, C.Demancin and G.Yu
DeepSynergy: predicting anti-cancer drug synergy with Deep Learning
K.Kremer, K.Patwardhan, S.Kocher, A.Bender, K.Chibulsu and G.Klambauer
GRAM-CNN: a deep learning approach with local context for named entity recognition in biomedical text
Q.Zhu, X.Ji, A.Daconesa and C.Perera
Merging value imputation for LC-MS metabolomics data by incorporating metabolic network and adduct ion relations
Z.Jin, J.Kang and T.Yu

Data and text mining
DiffSynergy: predicting anti-cancer drug synergy with Deep Learning
K.Kremer, K.Patwardhan, S.Kocher, A.Bender, K.Chibulsu and G.Klambauer

Genome Context Viewer: visual exploration of multiple annotated genomes using microsynonym
A.Cleary and A.Farmer

Aether: leveraging linear programming for optimal cloud computing in genomics

CscoreTool: fast Hi-C compartment analysis at high resolution
X.Zheng and Y.Zheng
DiffGraph: an R package for identifying gene network rewiring using differential graphical models
X.-F.Zhang, L.Ou-Yang, S.Yang, X.Hu and H.Yan

Sequence analysis
TarHunter, a tool for predicting conserved microRNA targets and target mimics in plants
X.Ma, C.Liu, L.Gu, B.Mo, X.Cao and X.Chen
fMLC: fast multi-level clustering and visualization of large molecular datasets
D.Vu, S.Georgievska, S.Szoke, A.Kuzniar and V.Robert
PRAPI: post-transcriptional regulation analysis pipeline for Iso-Seq
Y.Gao, H.Wang, H.Zhang, Y.Wang, J.Chen and L.Gu
Mustguseal: a server for multiple structure-guided sequence alignment of protein families
D.A.Sukhotin, K.E.Kopylov, N.N.Popova, V.V.Voevodin and V.K.Svedas

continued inside back cover
