Institutions

Subscriptions

A subscription to The Journals of Gerontology, Series A: Biological Sciences and Medical Sciences comprises 12 issues. Prices include postage; for subscribers outside the Americas, issues are sent air freight. Annual rates are available on request. Access to the journal content is available through Oxford Journals. Institutional rates are available upon request. Please see https://academic.oup.com/journals/pages/policies/ for further information on institutional rates and permission to reproduce articles or information from this journal.

Permissions

For information on how to request permissions to reproduce articles or information from this journal, please visit https://academic.oup.com/journals/pages/access_purchase/rights_and_permissions.

Advertising

Advertising, inserts, and artwork inquiries should be addressed to Advertising and Special Sales, Oxford Journals, Oxford University Press, Great Clarendon Street, Oxford, OX2 6DP, UK. Tel: +44 (0)1865 354674; Fax: +44 (0)1865 355774; E-mail: jas.admin@oup.com.

Contact Information

Journals Customer Service Department, Oxford University Press, Great Clarendon Street, Oxford OX2 6DP, UK. E-mail: pubs@oup.com. Tel: +44 (0)1865 353907; Fax: +44 (0)1865 353485. In the Americas, please contact: Journals Customer Service Department, Oxford University Press, 201 Evans Road, Cary, NC 27513-2513, USA. E-mail: pubs@oup.com. Tel: (800) 852-7722 (toll-free in US/Canada) or (919) 677-1714. In Japan, please contact: Journals Customer Service Department, Oxford University Press, 4-5-10 Shiba, Minato-ku, Tokyo, 108-8436, Japan. E-mail: custserv@japa.oup.com. Tel: (81) 3 3443 2929.

Methods of Payment

Payment should be made by: (a) check or money order payable to Oxford University Press; (b) direct deposit to the University’s account at Washington, DC, and additional mailing offices. POSTMASTER: Send address changes to The Journal of Gerontology, 711 North Washington Street, Alexandria, VA 22314-3791 (ISSN: 1079-5006) is published monthly by Oxford University Press, 2001 Evans Road, Cary, NC 27513-2513. Periodicals Postage Paid at Washington, DC, and additional mailing offices. POSTMASTER: Send address changes to The Journal of Gerontology, 711 North Washington Street, Alexandria, VA 22314-3791.

A Young Blood Environment Decreases Aging of Senile Mice Kidneys
Qi Huang, Yichun Ning, Dong Liu, Ying Zhang, Diangeng Li, Yinping Zhang, Zhong Yin, Bo Fu, Guangyan Cai, Xuefeng Sun, and Xiangmei Chen ..................................................421

High Intensity Interval Training Improves Physical Performance and Frailty in Aged Mice
Kenneth Ladd Seldeen, Ginger Lasky, Merced Marie Leiker, Manhui Pang, Kirkwood Ely Personius, and Bruce Robert Troen ..........................................................429

Activity of the Hypothalamic Melanocortin System Decreases in Middle-Aged and Increases in Old Rats
Nóra Füredi, Alexandra Mikó, Balázs Gaszner, Diána Feller, Ildikó Rostás, Judit Tenk, Margit Solymár, Mátra Balaskó, and Erika Pétervári. ........................................438

The Relationship Between Dietary Macronutrients and Hepatic Telomere Length in Aging Mice

The Antiepileptic Ketogenic Diet Alters Hippocampal Transporter Levels and Reduces Adiposity in Aged Rats
Abbi R. Hernandez, Caesar M. Hernandez, Keila T. Campos, Leah M. Truckenbrod, Yasemin Sakarya, Joseph A. McQuail, Christy S. Carter, Jennifer L. Bizon, Andrew P. Maurer, and Sara N. Burke. ..............................................................450

IGF-I Gene Therapy in Aging Rats Modulates Hippocampal Genes Relevant to Memory Function
Joaquin Pardo, Martin C. Abba, Ezequiel Lacunza, Olalekan M. Ogundele, Isabel Paiva, Gustavo R. Morel, Tiago F. Outeiro, and Rodolfo G. Goya. ........................................459

Swimming Training Improves Myocardial Mechanics, Prevents Fibrosis, and Alters Expression of Ca2+ Handling Proteins in Older Rats
Amanda Yoshizaki, Ednei Luiz Antonio, José Antonio Silva Junior, Renato Oliveira Crajoinas, Flavio André Silva, Adriana Castello Costa Girardi, Danilo Sales Bocalini, Leslie Andrews Portes, Luis Felipe Neves dos Santos, Fernando Pereira Carlos, Paulo de Tarso Camillo de Carvalho, Paulo José Ferreira Tucci, and Andrey Jorge Serra ..................................................468
The Journal of Gerontology: BIOLOGICAL SCIENCES

The Journal of Gerontology: Biological Sciences publishes articles on the biological aspects of aging in areas such as translational gerontology, biomarkers of aging, biochemistry, biogerontology, comparative and evolutionary biology, endocrinology, exercise science, genetics, immunology, neuroscience, nutrition, pathology, pharmacology, physiology, and the biological mechanisms of late-life diseases. Biologocal insights gleaned in studies from invertebrates, vertebrates, and mammalian species including humans will be considered. The journal is particularly interested in publishing research on translational gerontology including interventions designed to enhance longevity and healthspan.

Changes in Everyday and Digital Health Technology Use Among Seniors in Declining Health
David M. Levine, Stuart R. Lipsitz, and Jeffrey A. Linder ................................................................. 552
The Journal of Gerontology: MEDICAL SCIENCES

The Journal of Gerontology: Medical Sciences publishes articles on health-related aspects of human aging. Topics of interest may range from biomarkers of aging, multisystem physiology of aging, multimorbidity, age-related disability including the cognitive, physical and psychological aspects of function, novel aging populations such as ethnic and racial minorities or the oldest old, global health and aging, healthy aging and health span. Appropriate designs include observational studies, clinical trials, basic biology or physiology in human subjects, and health services research. All health-related disciplines are welcome. The journal is especially interested in translational research that addresses the functional consequences of aging biology and/or age-related disease, and novel interventions designed to slow and prevent functional decline and improve health outcomes.
