IAVCEI/GSL publishing agreement

This volume is published under an agreement between the International Association of Volcanology and Chemistry of the Earth's Interior (IAVCEI) and the Geological Society of London and was endorsed and co-edited by members of the IAVCEI Remote Sensing Commission.

GSL is the publisher of choice for books arising from IAVCEI meetings and IAVCEI receives a fee for all books published under this agreement.

Books published under this agreement are subject to the Society's standard rigorous proposal and manuscript review procedures.

It is recommended that reference to all or part of this book should be made in one of the following ways:

HARRIS, A. J. L., DE GROEVE, T., GAREL, F., & CARN, S. A. (eds) 2016. *Detecting, Modelling and Responding to Effusive Eruptions*. Geological Society, London, Special Publications, **426**.

PATRICK, M. R., KAUAHIKAUA, J., ORR, T., DAVIES, A. & RAMSEY, M. 2016. Operational thermal remote sensing and lava flow monitoring at the Hawaiian Volcano Observatory. *In*: HARRIS, A. J. THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of over 10 000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG: Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk.

Contents

HARRIS, A., DE GROEVE, T., CARN, S. & GAREL, F. Risk evaluation, detection and simulation during effusive eruption disasters 1

Hot spot detection, tracking and targeting

WRIGHT, R. MODVOLC: 14 years of autonomous observations of effusive volcanism from space 23

PERGOLA, N., COVIELLO, I., FILIZZOLA, C., LACAVA, T., MARCHESE, F., PACIELLO, R. & TRAMUTOLI, V. A review of RST_{VOLC}, an original algorithm for automatic detection and near-real-time monitoring of volcanic hotspots from space 55

LOMBARDO, V. AVHotRR: near-real time routine for volcano monitoring using IR satellite data 73

ZAKŠEK, K., PICK, L., SHIRZAEI, M. & HORT, M. Thermal monitoring of volcanic effusive activity: the uncertainties and outlier detection 93

RAMSEY, M. S. Synergistic use of satellite thermal detection and science: a decadal perspective using ASTER 115

DAVIES, A. G., CHIEN, S., TRAN, D. & DOUBLEDAY, J. The NASA Volcano Sensor Web, advanced autonomy and the remote sensing of volcanic eruptions: a review 137

Towards operational tracking and dissemination systems

FERRUCCI, F. & HIRN, B. Automated monitoring of high-temperature volcanic features: from high-spatial to very-high-temporal resolution 159

COPPOLA, D., LAIOLO, M., CIGOLINI, C., DONNE, D. D. & RIPEPE, M. Enhanced volcanic hot-spot detection using MODIS IR data: results from the MIROVA system 181

GANCI, G., BILOTTA, G., CAPPELLO, A., HERAULT, A. & DEL NEGRO, C. HOTSAT: a multiplatform system for the thermal monitoring of volcanic activity using satellite data 207

GOUIER, M., GUÉHENNEUX, Y., LABAZUY, P., CACAULT, P., DECRIEM, J. & RIVET, S. HOTVOLC: a web-based monitoring system for volcanic hot spots 223

GAREL, F., KAMINSKI, É., TAIT, S. & LIMARE, A. A fluid dynamics perspective on the interpretation of the surface thermal signal of lava flows 243

BARNIE, T. D. & OPPENHEIMER, C. Inverting multispectral thermal time-series images of volcanic eruptions for lava emplacement models 257

CARN, S. A. On the detection and monitoring of effusive eruptions using satellite SO₂ measurements 277

Lava flow modelling

TARQUINI, S. & FAVALLI, M. Simulating the area covered by lava flows using the DOWNFLOW code 293

HARRIS, A. J. L., RHÉTY, M., GURIOLI, L., VILLENEUVE, N. & PARIS, R. Simulating the thermorheological evolution of channel-contained lava: FLOWGO and its implementation in EXCEL 313

KELFOUN, K. & VARGAS, S. V. VolcFlow capabilities and potential development for the simulation of lava flows 337

Acknowledgements

Preparation of this book was supported by Labex CLERVOLC (Clermont-Ferrand Centre for Volcano Research: <http://clervolc.univ-bpclermont.fr/>) who funded collation of the directories for operational satellite-based hot spot detection and lava flow simulation capabilities; as well as the implementation of the GIS test (as reported in the concluding Chapters and their Appendices). Labex CLERVOLC also funded a science proof reader who completed all final manuscript checks; where we

are extremely grateful to Fran van Wyk de Vries for her thorough, meticulous, professional and efficient work. Likewise, we thank the hard work of all reviewers, whose thorough reviews ensured that not only is this contribution as complete as-is possible, but also of a high, peer-reviewed standard. Finally, we thank Serge Gélabert for kindly making available the cover photo used in this publication. This is CLERVOLC publication 187.
