Geological Society books refereeing procedures

The Society makes every effort to ensure that the scientific and production quality of its books matches that of its journals. Since 1997, all book proposals have been refereed by specialist reviewers as well as by the Society's Books Editorial Committee. If the referees identify weaknesses in the proposal, these must be addressed before the proposal is accepted.

Once the book is accepted, the Society Book Editors ensure that the volume editors follow strict guidelines on refereeing and quality control. We insist that individual papers can only be accepted after satisfactory review by two independent referees. The questions on the review forms are similar to those for *Journal of the Geological Society*. The referees' forms and comments must be available to the Society's Book Editors on request.

Although many of the books result from meetings, the editors are expected to commission papers that were not presented at the meeting to ensure that the book provides a balanced coverage of the subject. Being accepted for presentation at the meeting does not guarantee inclusion in the book.

More information about submitting a proposal and producing a book for the Society can be found on its website: www.geolsoc.org.uk.

It is recommended that reference to all or part of this book should be made in one of the following ways:

EGGERS, M. J., GRIFFITHS, J. S., PARRY, S. & CULSHAW, M. G. (eds) 2016. *Developments in Engineering Geology*. Geological Society, London, Engineering Geology Special Publications, **27**.

THE GEOLOGICAL SOCIETY

The Geological Society of London (GSL) was founded in 1807. It is the oldest national geological society in the world and the largest in Europe. It was incorporated under Royal Charter in 1825 and is Registered Charity 210161.

The Society is the UK national learned and professional society for geology with a worldwide Fellowship (FGS) of over 10 000. The Society has the power to confer Chartered status on suitably qualified Fellows, and about 2000 of the Fellowship carry the title (CGeol). Chartered Geologists may also obtain the equivalent European title, European Geologist (EurGeol). One fifth of the Society's fellowship resides outside the UK. To find out more about the Society, log on to www.geolsoc.org.uk.

The Geological Society Publishing House (Bath, UK) produces the Society's international journals and books, and acts as European distributor for selected publications of the American Association of Petroleum Geologists (AAPG), the Indonesian Petroleum Association (IPA), the Geological Society of America (GSA), the Society for Sedimentary Geology (SEPM) and the Geologists' Association (GA). Joint marketing agreements ensure that GSL Fellows may purchase these societies' publications at a discount. The Society's online bookshop (accessible from www.geolsoc.org.uk) offers secure book purchasing with your credit or debit card.

To find out about joining the Society and benefiting from substantial discounts on publications of GSL and other societies worldwide, consult www.geolsoc.org.uk, or contact the Fellowship Department at: The Geological Society, Burlington House, Piccadilly, London W1J 0BG; Tel. +44 (0)20 7434 9944; Fax +44 (0)20 7439 8975; E-mail: enquiries@geolsoc.org.uk.

For information about the Society's meetings, consult *Events* on www.geolsoc.org.uk. To find out more about the Society's Corporate Affiliates Scheme, write to enquiries@geolsoc.org.uk

Contents

Introduction

EGGERS, M. J. Diversity in the science and practice of engineering geology 1

Urban engineering geology

PRICE, S. J., FORD, J. R., CAMPBELL, S. D. G. & JEFFERSON, I. Urban Futures: the sustainable management of the ground beneath cities 19

MARKER, B. R. Urban planning: the geoscience input 35

KOZLYAKOVA, I. V., EREMINA, O. N., ANISIMOVA, N. G. & KOZHEVNIKOVA, I. A. Study of geology and Carboniferous subcrop topography upon engineering geological mapping of Moscow territory 45

TUĞRUL, A., YILMAZ, M., SÖNMEZ, İ. & HASDEMİR, S. Sustainable management of aggregate resources in İstanbul 55

ENTWISLE, D. C., CULSHAW, M. G., HULBERT, A. G., SHELLEY, W. A., SELF, S. J. & DOBBS, M. R. The Glasgow (Scotland) geotechnical GIS: a desk study tool 63

Engineering geology in mining

BAXTER, H. Geophysics, geochemistry and engineering geology: how disciplines combine to improve mine slope design in the Pilbara detrital valleys of Western Australia 81

CAMMACK, R. Developing an engineering geological model in the fractured and brecciated rocks of a copper porphyry deposit 93

POPE, D., DURAN, A., GROCCOTT, G., HOLM, O. & BELL, A. Geological structural controls on stability of footwall slopes: an example from the Bowen Basin, Queensland 101

STRANG, D. R. Whitehall quarry, Northern Wedge failure: 22 years of investigation 111

Engineering geology in managing risk from geohazards

FLENTJE, P., MINER, T., STIRLING, D., PALAMAKUMBURE, D. & WINDLE, D. Landslide inventory and susceptibility zoning across SE Australia 119

PARRY, S. Landslide hazard assessments: problems and limitations. Examples from Hong Kong 135

DI CAPUA, G., PEPPOLONI, S., AMANTI, M., CIPOLLONI, C. & CONTE, G. Site classification map of Italy based on surface geology 147

Geological models for engineering studies

GRIFFITHS, J. S. Incorporating geomorphology in engineering geological ground models 159

GOLDSMITH, R. & McCUE, K. Revised hazard assessment for Afulilo Dam, Samoa	169
FABBROCINO, S., PADUANO, P., LANZANO, G., FORTE, G., SANTUCCI DE MAGISTRIS, F. & FABBROCINO, G. Engineering geology model for seismic vulnerability assessment of critical infrastructures	179
Interaction of engineering geology and geomechanics	
LI, L., DENG, X., TAN, Y., HUANG, B. & YANG, Z. Siting method of the ancients in the excavation of Longyou Caverns, 2000 years ago	197
TAKAHASHI, M., KATO, M., LIN, W. & SATO, M. Three-dimensional pore geometry and permeability anisotropy of Berea sandstone under hydrostatic pressure: connecting path and tortuosity data obtained by microfocus X-ray CT	207
MOEIN, F., XUE, J., DENT, B. & MACKAY, R. Review of the historical data characterizing Latrobe Valley brown coal consolidation behaviour	217
INDRAWAN, I. G. B., WILLIAMS, D. J. & SCHEUERMANN, A. Effects of saline coal seam gas water on consistency limits, compaction characteristics and hydraulic conductivities of clays used for liners	227
HE, L. & WEN, B.-P. Effect of porewater salinity on residual shear strength of clays and their mixtures	239
Index	249
