Gfi228 – Erratum

Diagnosis and monitoring a case of light chain deposition disease in the kidney using a new, sensitive immunoassay

Ian Brockhurst, Kevin P. G. Harris and Claire S. Chapman

The authors would like to apologise for the error in the text accompanying Figure 1 for the above paper.

The correct text should read as follows:

Fig. 1. Electron microscopy showing linear, homogenous electron dense deposits on the internal aspect of glomerular basement membranes.

doi:10.1093/ndt/gfi235

Gfi235 – Erratum

Irbesartan reduces creatinine clearance in type 1 diabetic children with renal hyperfunction: a randomized, double-blind, placebo-controlled trial

Mario R Salcedo-Alejos, Felipe Banda-Espinoza, Martha Rodríguez-Morán and Fernando Guerrero-Romero*

In the second paragraph, line 7, the passage ‘...if they had renal hyperfunction, defined as a CCR > 20 ml/min/1.73 m² body surface area’ should read ‘...if they had renal hyperfunction, defined as a CCR > 120 ml/min/1.73 m² body surface area’. The complete and correct passage is below:

Children were eligible to participate if they had renal hyperfunction, defined as a CCR > 120 ml/min/1.73 m² body surface area, published in the October 2005 issue of Nephrology Dialysis Transplantation.

The authors would like to apologise for this error.
