The band corresponding to spliced \textit{MER3} RNA was incorrectly identified in Figure 5. Based on the corrected figure (shown above), only 4.3\% of the \textit{MER3} RNA is spliced in the \textit{snu17Δ} strain; however, when Mer1p is expressed, 27.1\% of the \textit{MER3} RNA is spliced. Thus, Snu17p is needed for the Mer1p-activated splicing of \textit{AMA1} and \textit{MER2}, but not \textit{MER3}. The authors regret the error.
