Corrigendum

Equity, efficiency, and financial risk of alternative arrangements for funding long-term care systems in an ageing society

José-Luis Fernández and Julien Forder

In their article ‘Equity, efficiency, and financial risk of alternative arrangements for funding long-term care systems in an ageing society’, published in vol. 26 no. 4, José-Luis Fernández and Julien Forder regret omitting to acknowledge the data sources used in their dynamic micro-simulation model (DMS), the results of which appear in the paper. They wish to add the following acknowledgement:

The PSSRU dynamic micro-simulation model uses material from the British Household Panel Survey, which is copyright of the Institute for Social and Economic Research and from the English Longitudinal Survey of Ageing, which is copyright of the National Centre for Social Research, University College London and Institute for Fiscal Studies. Both datasets were made available via the UK Data Archive.
