

INDEX TO VOLUME 54, 2024

- Anschutz, P., and Bernhard, J. M.**, 2023 Joseph A. Cushman Award: Professor Frans Jorissen, University of Angers, France
 v. 54, no. 1, p. 75–76.
- Basso, D., Hallock, P., Stainbank, S., De Leau, E., Martínez-Colón, M., Pisapia, C., and Samankassou, E.**, In Memory of Dr. Silvia Spezzaferri, PHD, MER (1961–2024)
 v. 54, no. 4, p. 406–409.
- Burkett, A. M., Huber, B. T., Young, J. R., Katz, M. E., Borrelli, C., Fung, M. K., De Mello, R., Kochhann, K. G. D., Dameron, S. N., Thomas, E., and Alegret, L.**, Bforams@mikrotax: An online database for deep-sea benthic foraminiferal taxonomy
 v. 54, no. 4, p. 394–403.
- Ćosović, V.**, In memory of Ivan Gušić (1938–2024), Micropaleontologist, Professor Emeritus of Faculty of Science, University of Zagreb
 v. 54, no. 4, p. 404–405.
- Dolan, J. R.**, On the curious illustration of the foraminifer *Peneroplis planatus* in Haeckel's *Kunstformen Der Natur (1899–1904)*
 v. 54, no. 1, p. 49–53.
- Doubrawa, M., Stassen, P., Robinson, M. M., and Speijer, R. P.**, Paleoenvironmental and paleoecological dynamics of the U.S. Atlantic Coastal Plain prior to and during the Paleocene-Eocene Thermal Maximum
 v. 54, no. 2, p. 143–171.
- Fehrenbacher, J. S., Hupp, B. N., Branson, O., Evans, D., Foster, G. L., Glock, N., Thirumalai, K., and Wycech, J.**, Individual foraminiferal analyses: A review of current and emerging geochemical techniques
 v. 54, no. 4, p. 312–331.
- Ferrández-Cañadell, C.**, New early Rupelian endemic porcellaneous larger foraminifera from the Prebetic Range, westernmost Tethys. Discussion on Praerhapydionina
 v. 54, no. 1, p. 20–35.
- Hallock, P., Koukousioura, O., and Badreldin, A. M.**, Why *Amphistegina lobifera*, a tropical benthic foraminiferal species, is thriving at temperate latitudes in the Mediterranean Sea
 v. 54, no. 3, p. 237–248.
- Hallock, P., Saraswati, P. K., and Less, G.**, In Memory of Prof. Dr. Ercan Özcan
 v. 54, no. 2, p. 198–198.
- Hayward, B. W., and Nolden, S.**, Hochstetter's fossil foraminiferal collections on the Novara Expedition, 1857–1859
 v. 54, no. 3, p. 271–289.
- Hesemann, M., and Ketelsen, D.**, Foraminifera in the glacial erratic rock Sternberger Gestein from northern Germany
 v. 54, no. 3, p. 249–263.
- Hupp, B. N., and Fehrenbacher, J. S.**, Intratest trace element variability in polar and subpolar planktic foraminifera: Insights into vital effects, ontogeny, and biomineralization processes
 v. 54, no. 4, p. 355–374.
- Kozdon, R.**, *In situ* stable isotope measurements in foraminiferal tests by SIMS
 v. 54, no. 4, p. 332–341.
- Lane, M. K., Fehrenbacher, J., Hönisch, B., Haynes, L., and Crump, B. C.**, Advancing individual foraminifera analysis by combining molecular, morphometric, and trace element geochemistry
 v. 54, no. 4, p. 342–354.
- Langer, M. R., Trubin, Y., Tian, S. Y., and Goldstein, S. T.**, Heterogeneity among juvenile megaspheres in *Peneroplis pertusus* (Forskål) from the Line Islands (Pacific Ocean): Size range, morphotypes, and test deformations
 v. 54, no. 3, p. 264–270.
- Londoño, V., and Collins, L. S.**, Effect of size fractions of foraminifera on reconstructing the paleoceanography of Cretaceous Oceanic Anoxic Event 2
 v. 54, no. 1, p. 54–64.
- Marín, A. R., Hallock, P., and Martínez-Colón, M.**, Benthic foraminiferal dynamics in reef-associated sediments of Jobos Bay, Puerto Rico: 2018–2019
 v. 54, no. 2, p. 95–106.
- Miller, K. G., Browning, J. V., Keigwin, L. D., Chaytor, J. D., Schneider, E. R., Richtmyer, M., and Schmelz, W. J.**, Holocene foraminifera, climate, and decelerating rise in sea level on the mud patch, southern New England continental shelf
 v. 54, no. 2, p. 172–187.
- Mohammadi, E.**, The Oligo-Miocene Qom Formation (Iran): Re-examination of biostratigraphy and age interpretations in the Sanandaj–Sirjan and Central Iran basins (NE margin of the Tethyan Seaway)
 v. 54, no. 3, p. 202–216.

- Murray-Wallace, C. V., Hidayat, R., and Biribo, N.**, Application of amino acid racemization to the dating of foraminifers and the identification of remanié fossils and reworked sediments v. 54, no. 4, p. 375–393.
- Patarroyo, G. D., Torres, G. A., and Gómez, D. F.**, Foraminiferal assemblages as bioindicators in the western Caribbean: Albuquerque Cay (Colombia) v. 54, no. 1, p. 36–48.
- Poirier, R. K.**, Foreword to this special issue on foraminiferal geochemistry v. 54, no. 4, p. 311.
- Prabhakar, M., Thirumalai, K., Cronin, T. M., Gemery, L., Thomas, E. K., and Raftar, P. A.**, Morphotypical and geochemical variations of planktic foraminiferal species in Siberian and Central Arctic Ocean core tops v. 54, no. 1, p. 1–19.
- Prayudi, S. D., Tawabini, B. S., Korin, A., and Kaminski, M. A.**, Morphological deformities in benthic foraminiferal assemblages from shallow marine and lagoonal environments of the western Arabian Gulf v. 54, no. 3, p. 290–308.
- Rohret, S. M., and Bernhard, J. M.**, Inhabitation of bathyal hydrocarbon seeps by early-branching benthic foraminifera: Implications for Neoproterozoic ecosystem functioning v. 54, no. 3, p. 217–236.
- Smart, S. M., Schiebel, R., Jochum, K. P., Chaabane, S., Jentzen, A., Repschläger, J., Stoll, B., Weis, U., and Haug, G. H.**, Sightings of the rare *Globorotalia cavernula* in the Subantarctic south of Africa: Biogeochemical and ecological insights v. 54, no. 2, p. 81–94.
- Sutton, S. R., Culver, S. J., Hayek, L.-A. C., Mallinson, D. J., Robinson, M. M., Dowsett, H. J., and Buzas, M. A.**, Benthic foraminiferal community changes across the Miocene Climatic Optimum identified by SHEBI analysis, (SHE analysis for biozone identification), Calvert Cliffs, Maryland, USA v. 54, no. 2, p. 188–197.
- Versteegen, E., Macher, J. N., Rowley, S. J., and Renema, W.**, Changes in the microbial community associated with the large benthic foraminifera *Cycloclypeus carpenteri*, along a depth gradient v. 54, no. 1, p. 65–74.
- Wahlman, G. P., and Nestell, M. K.**, Middle Permian (Guadalupian) fusulinids from subsurface Midland Basin, West Texas, USA, including paleoenvironmental microspheric *Parafusulina* v. 54, no. 2, p. 117–142.
- Walker, J. S., and Cahill, N.**, Influence of foraminifera count size and rare species on transfer function results used in sea-level reconstructions v. 54, no. 2, p. 107–116.
