*The Mental Health Clinician* (MHC) continues to be a valuable resource for psychiatric practitioners and researchers with over 1 million article views in 2023. The quality work of authors, reviewers and the editorial board is reflected by MHC indexing in PubMed, Scopus, Google Scholar, and DOAJ. The editorial board greatly appreciates everyone who submitted a manuscript or a peer review in 2023 and would like to acknowledge those whose contributions have been exceptional.

### MHC Editors' Choice Award

The MHC Editors' Choice Award for Outstanding Articles identifies manuscripts that garnered the most interest from readership. The winners were chosen from articles published in the last 4 years (2020-2023) with the highest number of article views through PubMed. The editorial board commends these winners for making significant contributions to the psychopharmacology literature!

### Outstanding and Trusted Peer Reviewers

In addition to the hard work of our authors, the high quality of MHC articles is maintained by the scrupulous eyes of hundreds

of peer reviewers with at least 3 reviewers for each article. Peer reviewing is an often-under-recognized service that requires significant uncompensated time and effort. For someone to be invited repeatedly as a peer reviewer, their feedback must consistently be timely and of high quality. We wish to recognize our most reliable peer reviewers with the designations of Outstanding Peer Reviewer and Trusted Peer Reviewer, for those who completed at least 20 and 10 reviews since January 1, 2015, respectively and at least one within the past 2 years.

A sincere thank you to all peer reviewers for *The Mental Health Clinician* in 2023 and congratulations to our Outstanding and Trusted Peer Reviewers!
