PUBLICATIONS

The Royal Zoological Society of NSW (RZS NSW) publishes a fully refereed scientific journal, *Australian Zoologist*, specializing in topics relevant to Australian zoology. *Australian Zoologist* was first published by the Society in 1914, making it the oldest Australian journal specializing in zoological matters.

Publications of the RZS NSW strive to encourage a diversity of ideas, information and research on Australian animals and the conservation of their habitats. A principle of editorial policy is to maintain the relevance of the study of all aspects of zoology to modern science and to recognize the interdisciplinary nature of many of the frontiers of modern research. Original papers and review articles dealing with these topics are welcomed. The journal encourages authors to include illustrations, such as maps and photographs. All papers are rigorously edited and reviewed by independent referees.

Instructions for authors can be found at publications.rzsnsw.org.au. Intending authors are encouraged to contact the co-editors prior to submission.

Australian Zoologist is abstracted/indexed in Scopus; Geological Abstracts; Ecology Abstracts; Google Scholar; EBSCO; Science Direct, Informit Australian Public Affair and ISI Web of Science.

Opinions expressed in papers published in this journal are those of the author(s) and not necessarily those of the editors or of the Council of the Royal Zoological Society of NSW. Design & layout: R. Sherratt.
