While several studies have examined the effects of this disease on older adults, many do not utilize healthcare services when facing an ailment. Nevertheless, this frequency could be higher in Peruvians does not utilize healthcare services when facing an ailment. Nevertheless, this frequency could be higher in Peruvians does not utilize healthcare services when facing an ailment.

In conclusion, partnership is required among healthcare workers, organizational leaders, robot developers, and researchers; they should not work in silos. More research is needed to explore how to facilitate effective partnerships.
