The authors would like to apologise for the following error on page 422 in the paragraph beginning ‘Lithologically, the Grey Flysch Group...’:

In borehole MZ1 the lower levels of the Grey Flysch Group contain a fossil assemblage typical of inner platform (*Nummulites* sp., *Fallotia* sp., *Vidalina* sp., *Cribrstromoïdes* sp., *Rotalia* sp. and miliolids), whereas the upper levels contain outer platform assemblages including planktonic foraminifera (*Globotruncana* sp., keeled band morphotype and Heterohelicidae, biserial morphotype).

The sentence should instead read:

In borehole MZ1 the lower levels of the Grey Flysch group contain a fossil assemblage typical of inner platform (*Nummofallotia* sp., *Vidalina* sp., *Cribrstromoïdes* sp., *Rotalia* sp. and miliolids), while the upper levels contain outer platform assemblages including planktic foraminifera (*Globotruncana* sp., keeled band morphotype and Heterohelicidae, biserial morphotype).
