West Coast Shoe Company (Wesco) has an 82-year history of providing unique customer service, while producing the toughest, meanest, hardest working boots available. Specializing in custom-fit boots tailored to an individual's legs and feet, Wesco guarantees its boots to be comfortable and durable. The company also offers factory boot rebuilding on the boots they make. This highly specialized service can add years of life to a single pair. The company's complete line of handcrafted stock and custom fit boots includes the Timber, Jobmaster, and Highliner models. These boots were specifically designed with features geared toward loggers, forestry workers, and arborists.

Standard features on the Timber, Jobmaster, and Highliner boots include full-grain leather, full-leather insoles and midsoles, double vamps, and heavy white stitching for extra strength. The boots may also be customized by height, lacing, and heel. Call for a free catalog or shop online at www.westcoastshoe.com.

Corona Clipper is the preeminent supplier, nationally and internationally, of quality pruning and harvesting tools for the professional, agricultural, and arborist markets.

Corona's success is based on proven
classic tool designs, combined with the quality of handcrafted forgings.

XMap® Geographic is a robust mapmaking tool designed by DeLorme to help companies of any size perform geospatial analysis. XMap Geographic offers an easy-to-use geospatial solution for less than $500, with most of the functionality of traditional systems. XMap Geographic offers an easy interface, coordinate transformation, coordinate geometry, geocoding and more. XMap Geographic can be purchased with 3-D TopoQuad®, the ideal base map for all XMap Geographic projects. It includes 17 viewing levels of authentic USGS 7.5 minute quadrangle maps and 80 levels of DeLorme’s own topographic and street-level data. With the newly released upgrade, you can export georeferenced TIFF files to ArcView, AutoCAD, and other programs. One of 3-D TopoQuads often covers as much as an entire state. 3-D TopoQuads data is available separately; most states are only $99. For more information visit www.delorme.com.

Since 1986, Electronic Data Solutions has specialized in providing software for field computers for a variety of forestry applications. EDS offers an application generator for DOS handheld computers called DataPlus™. DataPlus lets you build applications that mimic clipboard data sheets. You design and test the application on your desktop PC then transfer it to your handheld.

DataPlus is designed for nonprogrammers, yet it is robust enough for the professional software developer. It supports many features to customize your application and easily integrates input from GPS receivers, lasers, and barcode scanners. Check our website, www.elecdata.com, for DataPlus demonstrations and product information.

Foresters Incorporated is a multidisciplinary forestry consulting firm and the home of Two Dog Software, a comprehensive forest inventory application developed by foresters. Designed to maximize efficiency in the field and office, Two Dog gives you control of data collection, inventory methods, volume tables, species, and products to produce the results you want. The field version runs on Juniper Systems, Itronix-Husky, and Haglof field computers, and the PC version runs in Microsoft Windows.

Our other services include growth-and-yield projections, financial analysis, and sustainability certification. We offer field services in the mid-Atlantic and Southeast for forest inventory and management.

Handheld Systems, Inc. is a leading provider of rugged handheld computers and data collection software to the forest products industry.

We are an authorized dealer for Itronix, Husky, and DAP Technologies, and can offer you several models of rugged handheld computers to suit different needs. All of our handheld computers are protected from shock, water, and extreme temperature ranges, and can survive a drop onto concrete. This makes our units ideally suited for timber cruising, log scaling, inventory, and wildlife surveys.

Logging and Harvesting Equipment

JOHN DEERE FORESTRY GROUP

PO Box 8806
Moline, IL 61266-8806
(309) 765-1848
Fax (309) 765-1859
E-mail: jm47028@deere.com
www.deere.com

Contact: Jim Mitchell, Manager, Marketing Communications

The John Deere Forestry Group markets a broad line of logging and harvesting equipment, including the world’s best-selling log skidders. We also market tracked forestry machines—including log loaders, road builders, harvesters, and delimbers—designed and built specifically for the woods. Other products include wheel log loaders, forestry guarded crawlers, and wheel and track feller-bunchers. In total, the Deere forestry fleet includes more than 50 models for logging and road building. All Deere products are backed by confidence-inspiring warranties and the industry’s best dealer network—ready to provide sales and service support when and where it’s needed.

BASF Corporation

Specialty Products Department
26 Davis Drive
PO Box 13528
Research Triangle Park, NC 27709
(800) 545-9525
www.forestrymanagement.com

BASF is the leading supplier of forestry products, such as Arsenal® herbicide Applicators Concentrate and Chopper® herbicide. Managing forestland with Arsenal results in superior, long-term hardwood control and excellent pine tolerance, which leads to maximum growth and high return-on-investment potential. Both products also promote the growth of food plants that are beneficial to wildlife. In addition to developing leading forestry technology, BASF also is committed to enhancing the industry through promotion of partnerships with industry organizations. For more information or the name of the BASF forestry product specialist near you, call (800) 545-9525 or visit BASF online at www.forestrymanagement.com.

Markers and Signs

NUTRON NAMEPLATE, INC.

31269 Lorain Road, PO Box 487
North Olmsted, OH 44070-0487
(440) 777-6660, ext. 227
Fax (440) 777-6664
E-mail: nutron@nutronnameplate.com
www.nutronnameplate.com

Contact: Bob Dunlap, Sales

Nutron Nameplate is a manufacturer of all types of signs, markers, tags, and placards for marking and posting private and public lands. Choose from custom or standard products including:

- Trailside markers. Embossed and colored markers for trail and path marking. Now also available with distance markers.
- Boundary markers. Enameled aluminum custom signs for repetitive marking in parks, lands tracts, and private property.
- Graphic property markers. The original posted signs, with both symbol and word messages for better communication.
- Location markers. Durable enameled aluminum tags for survey and location marking.

If you have a unique situation that calls for a special product, let us put our creative abilities to work for you. Call today for your free catalog.

SCENER SIGNS & SCREEN PRINTING, INC.

2803 Emery Drive
Wausau, WI 54401-9709
(800) 388-4811
Fax (715) 675-9975
E-mail: scenicsigns@g2a.net
www.scenicsigns.com

Contact: Marcia Dalsky, President

Scenic Signs specializes in signs for the recreation industry—since 1989. Our signs are of premium quality materials and workmanship. They were designed for durability and lasting good appearance in climates across the United States. The sign backs are of high-density polyethylene, the vinyl sign faces are fully reflective, and the graphics are screen printed. Custom signs have graphics applied with computer die-cut vinyl. We manufacture and sell direct, enabling moderate prices. Our customers include USDA Forest Service, states, counties, cities, parks, resorts, RV parks, campground, etc. Please contact us for a catalog or check our website.

VOSS SIGNS, LLC

PO Box 553
Manlius, NY 13104
(800) 473-0698
Fax (315) 682-7335
E-mail: signlle@aol.com
www.vossigns.com

Contact: Mary, Diane, or Chip, Sales

For more than 36 years, Voss Signs, LLC, has provided screen printed signs for foresters, tree farmers, land trusts, state and federal government agencies, and other natural resource professionals.

We specialize in custom signs on plastic and aluminum for long-term outdoor durability, along with a full line of in-stock signs including:

- Posted signs
- Boundary markers
- Prohibitive signs
- Warning and caution signs
- Parking and municipal signs
- Arrows
- Reflective trail signs
- Magnetic signs, and more

Contact: Mike Phelps, Manager

Haglof, Inc., has been serving the forest industry for 100 years. From increment borers, tree calipers, hypsometers, and distance measurement to computerized calipers, Haglof serves all your forest inventory needs. Our instruments have proved themselves as high quality, value-added instruments, being used in more than 200 countries.

Our new products include the Mantax Computer Caliper, which allows for quick data collection. The Vertex Hypsometer is an electronic hypsometer utilizing ultra sound to quickly determine tree heights. The DME 201 is a distance measurer using ultra sound to determine distance. The DME now comes with built-in prism factors to easily determine if borderline trees are to be tallied. We also offer T Cruise Inventory Software for use with our Mantax Computer Caliper, or simply as PC software for determining tract volume, values, or statistics.

LASER TECHNOLOGY, INC.
7070 South Tucson Way
Englewood, CO 80112
(303) 649-1000
Fax (303) 649-9710
E-mail: info@lasertech.com
www.lasertech.com
Contact: Kari Kiel, Marketing Communications Director

LTI designs and manufactures laser-based speed and distance measurement instruments.

LTI’s pulse lasers are rugged, lightweight, and easy to operate, giving you the ability to accurately measure and record information with a push of a button. Whether you’re a cruiser or an engineer, LTI lasers save you time and money, and increase productivity.

With LTI’s forestry lasers, you can calculate tree heights and horizontal distance, as well as flag out buffer zones in rain, fog, snow, and dense brush. Add directional information with our MapStar Modules, and you will have all the data necessary to derive X,Y, and Z coordinates for the target.

Refereeing Services and Supplies

JIFFY PRODUCTS OF AMERICA, INC.
951 Swanson Drive
Batavia, IL 60510-4202
(800) 323-1047

Fax (630) 406-3906
E-mail: jiffyforestry@aol.com
www.jiffyproducts.com
Contact: Heidi Rieckermann, Forestry Nursery Specialist

Jiffy manufactures sphagnum peat pellet and peat-pot propagation systems for seeding, growing, and handling forest tree seedlings of all types. Jiffy forestry growing systems have been proven in the field for quick growth, easy planting, and rugged root systems for maximum stability.

Our systems have been used in Canada and Europe for more than a decade. In the United States, Jiffy forestry pellets have been used in conifer and hardwood seed, cutting, and tissue culture propagation. Growers are able to automate seeding, growing, and planting. Our representatives will be happy to assist you in choosing the appropriate growing system.

Remote Sensing

CLARK LABS
950 Main Street
Worcester, MA 01610
(508) 793-7526
Fax (508) 793-8842
E-mail: idrisi@clarku.edu
www.clarklabs.org
Contact: Laurie Canavan, Assistant Director for Operations

Clark Labs develops and distributes the raster geographic analysis and image processing software system, Idrisi, and the digitizing and vector editing package, CartaLinx.

Idrisi is the industry leader in raster analytical functionality covering the full spectrum of GIS and remote sensing needs from database query, to spatial modeling, to image enhancement and classification. Idrisi offers more than 120 analytical routines, a graphical dynamic modeling environment, and full programmer-level access to the system.

CartaLinx: the Spatial Data Builder is a database development and full vector topological editing software package that supports output to Idrisi, ArcView, and several other desktop GIS formats.

ERDAS®, INC.
2801 Buford Highway Northeast
Atlanta, GA 30329

E-mail: bburroughs@imagelinks.com

ImageLinks is a privately held company offering aerial and satellite data along with our low-cost, rapid, high-volume image processing services to customers and value-added resellers worldwide.

ImageLinks is a nonbiased data provider. We sell and process all types of aerial or satellite data. Using a sensor model paradigm and elevation models, our unique proprietary process quickly converts image data to customer-specified geographic coordinate space. Orthorectification, geocoding through feature matching, and image-to-image registration capabilities result from the use of unique sensor models for each type of imagery.

Visit our website at www.imagelinks.com, or call Scott or Brenda for more information.

**OPTEM, Avimo Precision Instruments**

78 Schuyler Baldwin Drive
Fairport, NY 14450
(716) 223-2370
Fax (716) 223-3413
E-mail: info@optemintl.com
www.optemintl.com
Contact: Peter Williams, Director of Marketing

OPTEM provides remote sensing and photo interpretation workstations for change detection and map editing to the forestry, agriculture, natural resource management, land planning, and civil engineering markets. OPTEM’s most recent remote sensing innovation is the DTS (Digital Transfer Scope). DTS combines the resolution of hardcopy aerial photography with the versatility of advancing GIS technology. This powerful workstation performs all functions of stereo interpretation, digitizing, editing, and GIS from one desktop.

OPTEM also manufactures photo intelligence workstations for government and defense markets, as well as machine vision and inspection optical systems and microscope accessories for industrial, biomedical, research, education, and clinical segments.

Tree Paint and Markers

AMERICAN CODING AND MARKING INK COMPANY, INC.

1220 North Avenue
Plainfield, NJ 07062
(800) 844-0856
(908) 756-0373
Fax (908) 756-0570
E-mail: customer@treecoder.com
www.treecoder.com
Contact: Tiffany Brackett, Customer Service

Make Your Mark! The first time, every time...with TRECODER inks and the dependable TRECODER spot gun and backpack. TRECODER tree marking inks are scientifically formulated for superior brightness, visibility, permanency, and adhesion to bark. They have the ability to penetrate the bark irregularities—even “wrapping” around the underside of raised bark. TRECODER inks are nonsettling and never clog guns or other spray devices. Use the TRECODER spot gun and backpack to apply the inks to trees. The spot gun screws into the quart container, while the backpack uses the gallon container as its reservoir.

Nelson Paint Company

PO Box 2040
Kingsford, MI 49802
(906) 774-5566
Fax (906) 774-4264
www.nelsonpaint.com

Dependable Nelson Paint saves time and money.

Over the past 60 years, Nelson Paint has set the pace in forestry paint systems by offering the products needed to consistently create durable, highly visible markings. From the bitter cold of the Canadian North to the blazing heat and humidity of South American jungles—in every application, Nelson paints get the job done. Field-proven tools like the Nel-Spot Hand Gun and Nel-Spot Paint Hammer help speed up the marking process. Specially formulated paints like Boundary Mark, Super Spot, Econo Spot, Aero Spot, and Log Mark create highly visible markings with various levels of resiliency, depending on application demands. Nelson paints are unsurpassed in quality and performance and now you can buy direct at www.nelsonpaint.com.

The Professional Resource Guide is also posted on the SAF website, with links to all the companies and organizations listed. More details are just a click of the mouse away at [www.safnet.org/buyersguide/buyersguide.htm](http://www.safnet.org/buyersguide/buyersguide.htm).

For those companies and organizations who missed the opportunity to participate in this year’s print edition of the Professional Resource Guide, the SAF website offers the guide throughout the year. Your 100-word company description with free link can be posted at any time.

For rates and information, please contact William V. Brumby at (301) 897-8720, ext. 129, or brumbyb@safnet.org.
