RESEARCH ARTICLES

1  P. Lindemann-Matthies, D. Keller, X. Li and B. Schmid
   Attitudes toward forest diversity and forest ecosystem services—a cross-cultural
   comparison between China and Switzerland

10  Y. Zhang, C. Song, K. Zhang, X. Cheng and Q. Zhang
   Spatial-temporal variability of terrestrial vegetation productivity in the Yangtze River
   Basin during 2000–2009

24  C. Dulamsuren, M. Khishigjargal, C. Leuschner and M. Hauck
   Response of tree-ring width to climate warming and selective logging in larch forests of
   the Mongolian Altai

39  L. Tang, K. Wan, C. Cheng, R. Li, D. Wang, J. Pan, Y. Tao, J. Xie and F. Chen
   Effect of fertilization patterns on the assemblage of weed communities in an upland
   winter wheat field

51  G. R. Houseman
   Aggregated seed arrival alters plant diversity in grassland communities

59  C. Zhang, S. Li, L. Zhang, X. Xin and X. Liu
   Litter mixing significantly affects decomposition in the Hulun Buir meadow steppe of
   Inner Mongolia, China

68  D. Jin, X. Cao and K. Ma
   Leaf functional traits vary with the adult height of plant species in forest communities

77  F. Pulido, G. Moreno, E. García, J. J. Obrador, R. Bonal and M. Díaz
   Resource manipulation reveals flexible allocation rules to growth and reproduction in a
   Mediterranean evergreen oak

86  F. Wang, J. Liu, B. Zou, D. A. Neber, W. Zhu and Z. Li
   Species-dependent responses of soil microbial properties to fresh leaf inputs in a
   subtropical forest soil in South China
