I114 WHAT DO RHEUMATOLOGISTS NEED TO KNOW ABOUT SPORT AND EXERCISE MEDICINE?

Julia Newton

1Rheumatology/Sport and Exercise Medicine, University of Oxford, Oxford, UNITED KINGDOM

Sport and Exercise Medicine (SEM) is a relatively new specialty. SEM consultants and teams are working more commonly along side rheumatologists in both adult and adolescent services. Their expertise in MSK medicine and exercise medicine is complimentary to the skills of the rheumatologist. This talk will centre around clinical cases commonly seen within Sport and Exercise Medicine practice supported by an up to date evidence base.
