RE: “ANTIBIOTIC EXPOSURE BY 6 MONTHS AND ASTHMA AND ALLERGY AT 6 YEARS: FINDINGS IN A COHORT OF 1,401 US CHILDREN”

Risnes et al. (1) have reported one error in Table 4 of their article and would like to provide correction. In Table 4 found on page 316, in the column for “$P_{interaction}$” the value of interaction for the analysis stratified for parental asthma, 0.03, should be instead 0.20.

This correction does not change the main results or conclusions. The authors and the Journal apologize for the error.
