#### ACKNOWLEDGMENTS

This paper has been made possible through financial aid from the Penrose Bequest of The Geological Society of America. The writers wish especially to express their appreciation to Mr. Allen Bennison who supplied the material and information that have made this paper possible. The writers are also indebted to Mr. B. C. Adams for additional information about this section and the foraminiferal zones represented. Mrs. Jane Durham and Miss Pierina Rossello contributed much in the preparation of the plates and in the editing of the paper. Assistance in the preparation of these materials was furnished by the personnel of Works Progress Administration, Official Project 65-1-08-62, Unit A-1.
