Mkn009

Neuromuscular blocking drugs in infants and children

George H Meakin MD FRCA

There was error on p.145 in the above paper. In the section on cisatracurium, the ED$_{95}$ of cisatracurium was given incorrectly as 0.45 mg kg$^{-1}$; the correct value is 0.045 mg kg$^{-1}$. The derived intubating dose of 0.15 mg kg$^{-1}$ (~3xED$_{95}$) is stated correctly.

The author would like to apologize for this error.

Mkn010

Phosphodiesterase inhibitors and the cardiovascular system

Rob Feneck MB BS FESC FRCA

In this article, milrinone was described as a biguanide; it is in fact a bipyridine molecule.

The author would like to apologize for this error.
