In the originally published version of this manuscript, there were errors in the formatting and content of some tables.

In Table 2, values were incorrectly included in the header ‘Education’ row instead of the correct row.

In Table 3, “Ret. Mig. × religiosity” was duplicated and should in one instance instead read “Mig. × religiosity.”

In Table A1, the symbol for significance at $p < 0.10$ should read “$+$” instead of “$\sim$”.

In all tables, the key for significance labels has been rendered consistent as follows:

“n.s. $p > 0.10$; $+$ $p < 0.10$; $*$ $p < 0.05$; $**$ $p < 0.01$; $***$ $p < 0.001$”

These errors have been corrected online. The publisher apologizes for the error.
