RADIAL VELOCITIES OF SOUTHERN B STARS
DETERMINED AT THE RADCLIFFE OBSERVATORY—VII

A. D. Thackeray, S. B. Tritton and E. N. Walker

(Received 1973 February 23)

SUMMARY

Radial velocities and MK spectral classifications of 164 southern stars with
HD types B5 and earlier are presented. Cape UBV photometry is available
for nearly all the stars. For 116 stars there is no previously published velocity.
The compilation essentially completes the survey of velocities of early-type
stars brighter than 7.5 m over the whole sky.
