**Discovery of a Minor Planet** (1872).

By M. Prosper-Henry, Assistant-Astronomer of the Paris Observatory.

The observed position was

1872, Sept. 11, 15h 47m 35s, Paris M.T. R.A. 23h 59m 33s. S. Dec. 0° 55' 57''.

Hourly motion in R.A. = $-1''9$ (deduced from half-an-hour's observation).

Hourly motion in D = $-20''$.

Magnitude about 11.7.

The comparison star was 4612 of Argelander's zones.

The number of this planet will be provisionally (1872).
