

Professor Igor Leonardovich Pioro on His 65th Birthday

Professor Igor Leonardovich Pioro

(IETHPh) and the National Academy of Sciences of Ukraine (NASCU).

After three years, he graduated with a Ph.D. thesis entitled “Maximum Heat Fluxes at Boiling of Fluids in Two-Phase Thermosyphons,” his supervisor being Academician Professor V.I. Tolubinskiy. Dr. I. Pioro then worked in various positions including junior scientist, scientist, senior scientist, and from 1986 till 1992, was a Scientific Secretary of the IETHPh. In 1992, Dr. I. Pioro successfully defended his Doctor of Technical Sciences degree entitled “Maximum Heat Transfer in Two-Phase Thermosyphon Heat Exchangers,” later leading to the publication of several new texts on this and related topics.

As a result of this new work, Dr. Pioro was invited to establish research on two-phase thermosyphons at the University of Ottawa, Canada, and in 2000, he started work at the Chalk River Laboratories, Atomic Energy of Canada Ltd. (AECL). His original researches included supercritical heat-transfer and fluid-flow analysis and experiments; while also helping to develop new international collaborations and technical exchanges with Russia, China, the EU, and Ukraine under the Canadian Generation-IV research program. Wishing to pursue more basic studies and teaching, in 2006, Dr. Pioro then joined the newly established University of Ontario Institute of Technology (UOIT) (Oshawa, Canada), Faculty of Energy Systems and Nuclear Science (FESNS) as an Associate Professor. His successful and important career at the UOIT includes serving as the first Director of the Graduate Program, Associate Dean, and, currently, as a Professor, leading research on nuclear-energy systems, having mentored his many graduate and undergraduate students (see below) to always seek new perspectives and contribute new results.

Professor I. Pioro is a member of the major professional societies, such as the ASME (from 1996), ANS (2004), Canadian NS (2010), Canadian SME (2012) and, also, he is a Fellow of the

ASME (2012), CSME (2012), and Engineering Institute of Canada (2013). In 2008, he became a Professional Engineer (Ontario), and, in 2021, was elected as a Foreign Fellow of the National Academy of Sciences of Ukraine. During 2006–2013, he was a member of the Executive Committee of the ASME Nuclear Engineering Division (NED), and within 2011–2012, he was the Chair of the Executive Committee of the ASME NED and Chair of the 20th International Conference On Nuclear Engineering (ICONE20-POWER2012). As a key contribution and professional task, he was the Founding Editor of the ASME *Journal of Nuclear Engineering and Radiation Science*, which was established in 2014 with the first issue published in January of 2015. He has propelled this Journal to become a premier publication and, currently, he is an Editor-in-Chief, having overseen the entire work, enforced standards for quality and reviews, and coordinated the publication of hundreds of high-quality papers and articles.

In addition to his many achievements and activities, during his more than 42 years of professional career, Professor Pioro has published in total more than 500 publications including: 12 technical books, 36 chapters in encyclopedias, handbooks, and books, ~100 papers in refereed journals, ~300 papers in refereed proceedings of international and national conferences and symposiums, 26 patents and inventions, and ~50 major technical reports. Of these, the book “Heat Transfer and Hydraulic Resistance at Supercritical Pressures in Power Engineering Applications” not only was the first ASME and world text on this topic, but it has also become internationally a standard reference and source. “Handbook of Generation IV Nuclear Reactors” by Elsevier published in 2016 in which Dr. I. Pioro was an editor, appeared to be the first handbook in the world fully dedicated to the next generation reactors and related topics. He pioneered and produced some key recent papers (see publications listing) on the status and directions of nuclear energy globally and of modern nuclear systems worldwide, which have been among the most read and referenced works in the field.

Also, as a professor, he has prepared 3 Ph.D., 18 M.A.Sc., and 4 M.Eng. students with projects, 15 design-project groups of five undergraduate students in each (in total: about 75 students), and hundreds of undergrad students. His former students successfully worked in various positions in the Canadian nuclear industry and abroad. Professor I. Pioro can be proud of his students, two of them became the winners of the J.S. Boyce Award (UOIT) (2020 and 2012); one Ph.D. student has received the 2018 Outstanding Doctoral Thesis; three times his students were awarded the Akiyama Medal for the best student paper at ICONE-22 (2014, Prague, Czech Republic), ICONE-20 (2012, Anaheim, CA), and ICONE-17 (2009, Brussels, Belgium). Several of his students were awarded the Canadian NS (CNS) R.E. Jervis Award (2016, 2015, 2012, and 2013); his design-project student (fourth year) has received the 2012–2013 Roy G. Post-Foundation Scholarship (USA).

Professor Igor Pioro is a well-known promoter of nuclear power around the world. He gave lectures/seminars/presentations in

many world universities, institutes, research organizations, agencies, companies, etc., including National Research Nuclear University MEPhI (Moscow, Russia) (2021 and 2020); University of Pisa (Italy) (2021); Moscow State University (Russia) (2019); Institute of Eng. Thermophysics Chinese Academy of Sciences (2019); University of Cambridge (UK) (2018); Xi'an Jiao Tong University (China) (2018); IRSN (Saclay, France) (2018); Shanghai Jiao Tong University (China) (2017); NPIC (Chengdu, China) (2017 and 2010); Westinghouse Headquarters (USA) (2015); Budapest University of Technology and Economics (BME) (Hungary) (2014); J. Stefan Institute (Slovenia) (2014); University of Ljubljana (Slovenia) (2014); Technische Universität München (Germany) (2014); Universität Stuttgart (Germany) (2014); MIT (USA) (2013); Imperial College of Science, Technology and Medicine (London, UK) (2013); Technical University of Dresden (Germany) (2012); GRS (Munich, Germany) (2012); Technical University of Vienna (Austria) (2012); Fukui University of Technology (Japan) (2011); ICTP (Trieste, Italy) Politecnico di Milano (Italy) (2011); GRNSPG (Pisa, Italy) (2011); Nuclear Research Center Rez (Czech Republic) (2011); Czech Technical University in Prague (2011); etc.

In addition, Professor I. Piro gave a number of mass-media interviews including a video “The Chernobyl Conspiracy” on the 1986 Chernobyl NPP accident which aired on the Science Channel (SWR Media; Discovery Channel Documentary) (2019); Interview for the ASME (press on ASME J. NERS¹) (2018); and others.

For his achievements within the area of nuclear engineering, he has received many awards and certificates of appreciation including Harold A. Smith Outstanding Contribution Award from CNS (2017); Honorary Doctor of the National Technical University of Ukraine “Kiev Polytechnic Institute” (2013); The CNS Education and Communication Award (2011); ICONE Award from the ASME (2009); Medal of the National Academy of Sciences of Ukraine for the best scientific work of a young scientist (1990); Badge “Inventor of the USSR” for implementation of inventions into the industry (1990), etc.

More details on Dr. I. Piro biography is provided on the link.² The most significant scientific publications of Dr. I. Piro are listed in the [Appendix](#) at the end of this greeting.

On the occasion of his 65th birthday, on behalf of the Journal Board, his colleagues, friends, and students all over the world, we wish Professor Igor Piro a continuous active life in happiness and good health, and further scientific achievements!

Dr. Yuriy Antoshko
Program Officer, Canadian Nuclear Safety Commission,
Canada

Professor George Bereznai
Ph.D., P.Eng., Fellow CNS, UOIT, ON, Canada

Professor Mykola I. Bobyr
Corresponding Member of NAScU, Director of MMI, NTUU
“Igor Sikorsky Kyiv Polytechnic Institute”, Ukraine

Dr. Blair P. Bromley
Reactor Physicist, Canadian Nuclear Laboratories, Canada

Professor Natalia M. Fialko
Corresponding Member of NAScU, Head of Department,
IETHPh, NAScU, Ukraine

Dr. Yanping Huang
Senior Researcher, Nuclear Power Institute of China

Dr. Sama Bilbao y Leon
Director General, World Nuclear Association

Dr. Lin Chen
Institute of Engineering Thermophysics, Chinese Academy of
Sciences, China

Dr. Leon Cizelj
Head of Reactor Engineering Division, Jozef Stefan Institute,
Ljubljana, Slovenia, Professor of Nuclear Engineering,
University of Ljubljana, Slovenia

Dr. Romney B. Duffey
Idaho Falls, Idaho, USA

Dr. Hideki Kamide
Japan Atomic Energy Agency

Dr. Taras Kostyuk
CEO, Advanced Energy Technologies Consulting (AETC),
Inc., Canada

Dr. Yasuo Koizumi
Invited Researcher, The University of Electro-
Communications, Japan

Professor Georgiy A. Krivov
Chairman of Board – General Director, Ukrainian Research
Institute of Aviation Technology, JSC, Ukraine

Oleksiy Kravets
Founder & CTO, Cognitive Systems Corp., Canada

Dr. Konstantin Mikityuk
Paul Scherrer Institute, Switzerland

Sergey Lebedev
Kyiv, Ukraine

Professor Tomio Okawa
The University of Electro-Communications, Tokyo, Japan

Dr. Wargha Peiman
Senior Technical Engineer, Ontario Power Generation,
Canada; Former M.A.Sc. and Ph.D. student, FESNS, UOIT

Dr. Emmanuel Porcheron
HDR, Researcher, Deputy Head of Laboratory of Aerosol
Physics and Metrology, Airborne Pollutants and Containment
Dept., PSN-RES/SCA, Gif-Sur-Yvette Cedex, France

Dr. Eugene Saltanov
Former M.A.Sc. and Ph.D. student, FESNS, UOIT, Canada

Richard R. Schultz, Ph.D., P.E.
Chair, Executive Committee, ASME Nuclear Engineering
Division; Research Professor, Dept. of Nuclear Engineering,
Idaho State University, Pocatello, Idaho, USA

Professor Georgy Tikhomirov
National Research Nuclear University MEPhI (Moscow
Engineering Physics Institute), Russia

Dr. Lyubov Yushyna
Thermal Analyst, GaN Systems, Canada

Dr. Constantin Zvorykin
Associate Professor, NTUU “Igor Sikorsky Kyiv Polytechnic
Institute”, Ukraine

Appendix: The Most Significant Scientific Publications of Dr. I. Pioro

1. Handbook of Generation IV Nuclear Reactors, 2022, 2nd ed., I. L. Pioro, ed., Elsevier – Woodhead Publishing (WP), Duxford, UK, 1100 pages.
2. Handbook of Generation IV Nuclear Reactors, 2016, 1st ed., I. L. Pioro, ed., Elsevier – Woodhead Publishing (WP), Duxford, UK, 940 pages, accessed Oct. 26, 2021, https://www.gen-4.org/gif/jcms/c_9373/publications; <https://www.sciencedirect.com/book/9780081001493/handbook-of-generation-iv-nuclear-reactors>
3. Pioro, L. S., Pioro, I. L., Soroka, B. S., and Kostyuk, T. O., 2010, *Advanced Melting Technologies With Submerged Combustion*, RoseDog Publication Company, Pittsburg, PA, 420 pages.
4. Pioro, I. L., and Duffey, R. B., 2007, *Heat Transfer and Hydraulic Resistance at Supercritical Pressures in Power Engineering Applications*, ASME Press, New York, 334 pages.
5. Pioro, L. S., and Pioro, I. L., 1997, *Industrial Two-Phase Thermosyphons*, Begell House, New York, 288 pages.
6. Pioro, I., Duffey, R. B., Kirillov, P. L., and Pioro, R., 2021, “Pros and Cons of Commercial Reactor Designs, Section 2: Chapter. Part 1. Current Status of Electricity Generation in the World and Selected Countries,” *Encyclopedia of Nuclear Energy*, 1st ed., E. Greenspan, ed., Elsevier, UK, pp. 263–287 (3656 pages).
7. Pioro, I., Duffey, R. B., Kirillov, P. L., and Pioro, R., 2021, “Pros and Cons of Commercial Reactor Designs, Section 2: Chapter. Part 2. Current Status and Future Trends in the World Nuclear-Power Industry and Technical Considerations of Nuclear-Power Reactors,” *Encyclopedia of Nuclear Energy*, 1st ed., E. Greenspan, ed., Elsevier, UK, pp. 288–303 (3656 pages).
8. Duffey, R. B., Pioro, I., and Pioro, R., 2021, “World Energy Production and the Contribution of PHWRs, Chapter 1. Introduction,” *The Book*, 1st ed., Vol. 7, J. Riznic, ed., Elsevier, UK, 400 pages.
9. Pioro, I., Duffey, R. B., Kirillov, P. L., and Dort-Goltz, N., 2020, “Current Status of Reactors Deployment and SMRs Development in the World,” *ASME J. Nucl. Eng. Radiat. Sci.*, **6**(4), 24 pages (One of five the most read papers in J. NERS in 2021).
10. Pioro, I. L., 2019, “Current Status of Research on Heat Transfer in Forced Convection of Fluids at Supercritical Pressures,” *Nucl. Eng. Des.*, **354**(13), 14 pages.
11. Pioro, I., Duffey, R. B., Kirillov, P. L., Pioro, R., Zvorykin, A., and Machrafi, R., 2019, “Current Status and Future Developments in Nuclear-Power Industry of the World,” *ASME J. Nucl. Eng. Radiat. Sci.*, **5**(2), 27 pages (One of five the most read papers in J. NERS in 2021 and the most accessed in 2020).
12. Pioro, I., and Duffey, R., 2015, “Nuclear Power as a Basis for Future Electricity Generation,” *ASME J. Nucl. Eng. Radiat. Sci.*, **1**(1), 19 pages (One of five the most cited papers in J. NERS).
