Correction

Correction to: Association between state payment parity policies and telehealth usage at community health centers during COVID-19

This is a correction to: Clese Erikson, Jordan Herring, Yoon Hong Park, Qian Luo, Guenevere Burke, Association between state payment parity policies and telehealth usage at community health centers during COVID-19, Journal of the American Medical Informatics Association, Volume 29, Issue 10, October 2022, Pages 1715–1721, https://doi.org/10.1093/jamia/ocac104

In the originally published version of this manuscript, there was an error in the Abstract. The sentence “By April 2021, only 29% of CHC sites in states without payment parity policies used telehealth versus 42% in states without.” should read: “By April 2021, only 29% of CHC sites in states without payment parity policies used telehealth versus 42% in states with payment parity policies”.

In addition, the “Funding” section text has been amended to read: “This project is supported by the Bureau of Health Workforce (BHW), National Center for Health Workforce Analysis (NCHWA), Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of an award totaling $450,000, with zero percent financed with non-governmental sources. The contents are those of the author[s] and do not necessarily represent the official views of, nor an endorsement by HRSA, HHS, or the U.S. Government.”

These have been corrected online.
