

Index

- Acadian earth movements, 244, 262
Acanthodii, 256, 258
Albert Formation, 137, 155, 163, 261, 262
Algae, algal, 155, 160–167, 170
Allegheny, 1, 2, 5, 13, 18
Allegheny Formation, 2, 4, 5
Alluvial channel bars, 11–13, 15, 18
Alluvial fans, 287, 296, 297, 300
Alluvial plain, 89, 100–102
Amphibian footprints, 147, 153, 215
Anaspida, 256, 257
Antiarchi, 256–258
Appalachian Plateau, 1–3
Arkose, 186, 187, 190
Backswamp, 10, 11, 13, 15–18, 230, 231
Ball-and-pillow structure, 94, 252
Bar sand, *en echelon*, 10, 12–15
Beach, 94, 116, 195, 196, 202
Bed load transport, 227, 229
Bed roughness form, 224, 226
Bonaventure Formation, 250–252, 263
Boston Basin, 178, 199–201
Brackish fauna, 2
Braided systems, 119
Burrows, 216, 224, 246
Caithness Flagstone Series, 253, 261
Cansoan, 130, 131, 139, 140, 150, 154, 156–165, 170
Carbonate, 156–158, 160, 273, 278, 295, 299, 300
Carboniferous, 5, 127, 128, 130–133, 135, 136, 150, 152, 154, 164, 166–169, 213, 225
Catskill
 age, 26, 27
 compared with Spitsbergen and Britain, 57–62
 Delta, 110, 119
 facies, 23, 24, 86, 87
 stratigraphy, 23, 27, 28
 thickness, 25, 26
Chaff, 247, 255
Channel, 116, 191, 286, 288
 deposits, 192, 212, 223, 225, 226, 230
 structures, 223
 units, 140–152, 217
Channels, 12, 191, 286, 289
Cheirolepis, 256, 258
Clastic dikes, 283, 284
Coal, 4–10, 12, 14, 116, 153, 160, 183, 213
Coastal Plain deposits, 115
Codroy Group, 131, 136, 138
Colorado Delta, 229
Computer, 111, 112
Concretions, 87, 88, 143, 251
Conglomerate, 28–30, 114–117, 185–187, 190, 194–196, 201–206, 246, 287
Continental Slope, 213
Continental terranes, 114
Convolute laminae and laminations, 148, 218, 235
Crevasse deposits, 12, 147, 230, 231, 234, 235
Cross-laminae, 282, 284
Crossopterygii, 255, 256, 258, 259
Cross-stratification, 40–42, 83, 87–91, 94, 95, 138, 141–149, 151–154, 216–218, 223, 230, 231, 233, 246, 282
Current crescents, 37, 38, 116
Current directions, 223, 232
Current erosion, 219, 223, 233
Current flow conditions, 224–229
Current lineation, 94, 216, 223, 226
Current ripples, 143, 145, 146, 160, 216, 226
Cyclic deposition, 48–56
Cyclic sedimentation, 215, 225, 226, 234
Deltaic Plain, 2, 3, 18
Desiccation cracks, 247
Devonian, 22, 24–28, 58–60, 62–65, 75, 76, 79, 96–99, 109, 110, 113, 115, 119, 200, 241–243, 245, 248, 252, 254–258, 261
Dighton Conglomerate, 180–184, 190, 195
Distorted strata and laminae, 141, 142, 148, 149, 216
Distributaries, 91
Distributary delta environment, 149, 150
Dolomite, 155–157, 161–165, 276, 278, 279
Dwarf fauna, 92, 93
Electronic data processing, 111–113, 119
En echelon arrangement of bars and sandstones, 10, 12
Erosional surface, 87, 115, 215, 218, 223, 227, 234, 235
Estuarine sediments, 226
Euarthodira, 256, 257
Eugeosynclinal deposits, 213
Fanglomerate facies, 135–137, 168
Fining-upward cycles, 45–55, 87–88, 140–148, 170
Flame structure, 223
Flood deposition, 214, 230
Flood-plain deposits, 225, 234
Flood-plain top-stratum, 230, 234
Flood plains, 284, 288
Flow regime, 119, 151, 226, 227
Flute casts, 252, 253

- Flutes, 143, 148, 152, 155, 158, 160, 216, 223
 Fluvial, 2, 10, 12, 15, 115, 119, 285, 286
 Fluvial deposits, 87–89, 192–196
 Fluvial facies, 136, 137, 139–154, 169, 170
 Flysch, 225, 232
 Form-line maps, 97–100
 Framework grains, 220–222
 Fundy Basin, 131, 134, 139, 150
 Genesee Group, 110, 119
 Glacial varves, 225
 Graded bedding, 158, 160, 212, 213, 216, 218, 219, 224–228, 230, 232–235
 Gravitational settling, 225
 Graywacke, 5, 212, 213, 214, 223, 232–235
 Green River Formation, 155, 160, 165, 262, 300
 Groove mark, 223, 228
 Grooves, 148, 152, 155, 158, 160
 Hamilton Group, 75–79, 110
 Hasting Formation, 137, 156–158, 162
 Heavy minerals, 222
 Hopper-shaped casts, 155, 160, 163, 164, 166, 170
 Horizontal lamination, 216, 218, 219
 Horizontal stratification, 142, 143, 145–149, 152, 153
 Hortonian, 131, 132, 139, 154, 155, 163, 168–170
 Interchannel units, 141, 148, 149, 151, 153, 154
 Intraformational conglomerate, 215, 216, 219, 221
 Kanawha marine beds, 5, 10
 Keuper Sandstone, 213, 214
 Lacustrine facies, 130, 133, 134, 137, 154–159, 166, 167, 170
 Lakes, 267, 268, 284, 286–289, 291–294, 302
 Laminae, 281, 282
 Lateral accretion deposit, 230, 231, 234
 Levee, 12, 147
 Limestone, 158, 279, 280
 Lithic arenite, 115
 Lithic model, nonmarine, 2, 5, 10, 11, 18
 Lithosome geometries, 114, 116
 Load casts, 143, 148, 160
 Load deformation structure, 223
 Lobes, deltaic, 82, 97, 100
 Ludlowville Formation, 78–80, 84, 100–102, 104
 Marginal channel complex, 90–92, 101, 103
 Marine cyclothems, 55, 56
 Matrix, 219, 220, 233
 Megaripples, 78, 80
 Mica, 222, 262
 Millstone Grit, 226, 231
 Mississippian, 200, 249, 261
 Model, 1, 2, 5, 11, 17, 18, 112, 113
 Molasse, 213, 225
 Moscow Formation, 78–80, 100, 102, 104
 Mud cracks, 87, 89, 148, 149, 153, 158, 160, 170, 215, 217, 219, 223, 224, 230, 283, 295
 Mud-pebble conglomerate, 142, 145, 147
 Narragansett Basin, 178–180, 182–184, 189, 192, 197–204, 206, 212
 age of rocks, 196–199
 paleogeography, 201–203
 petrology, 185–190
 sedimentary structures, 190–196
 Natural levees, 12, 230, 231
 Noncyclic deposits, 56, 57
 Norfolk Basin, 178, 192, 197, 199, 212
 North Point Domain, 110, 114–117, 119
 Oil shale, 155, 158, 160, 165
 Old Red Sandstone, 57, 60–62, 64, 213, 225, 226, 229
 Oörites, 157, 158, 160, 162, 164
 Orthoquartzite, 7, 13
 Overbank deposits, 212, 230, 233–235, 289
 Paleocurrents, 83–86, 203, 214, 247, 284, 289
 Parrsboro Formation, 137, 156, 158, 159
 Parting lineation, 143, 223, 247
 Pennsylvanian, 2, 178, 183, 196, 201, 204, 205, 212, 214, 245
 Pictouan, 131, 134, 139, 150
 Plane bedform, 226, 227, 233, 235
 Point bar, 88, 145–148, 151, 152, 230
 Point counts, 219, 220, 222
 Pondville Conglomerate, 180, 181, 184, 186
 Ponkapoag locality, 213, 215–218, 224, 226, 229, 233
 Portland Point member, 76, 78–82, 101, 104
 Primary current lineation, 93, 94, 116
 Purgatory Conglomerate, 180, 181, 190, 195
 Pyrite, 155, 160, 166, 170, 249, 254
 Raindrop impressions, 148, 153, 154, 215, 232
 Repetitive graded bedding, 212, 213, 225, 232, 235
 Rhode Island Formation, 180, 181, 183–185, 188–190, 194, 195, 197, 198
 Rhythms, 114, 115, 117, 119
 Ripple-drift lamination, 218, 226, 282
 Ripple-laminae, 9, 87, 141–143, 145, 147, 153, 158, 226
 Ripple marks, 83, 84, 87, 89, 94, 160, 216, 223, 226, 252, 282, 284
 Rip-up clasts, 215, 216, 223, 228, 230, 234
 Riversdalian, 131–133, 139, 140, 168, 169

- Rocky Brook Formation, 137, 156, 157, 158, 162, 163, 165
 Sandstone, 5-10, 12-17, 30-34, 188-189, 214, 215
 Sandstone texture, 30, 31
 Scour-and-fill, 94, 216, 223, 228
 Scour marks, 37, 84, 90, 95, 228, 234, 235
 Seatrock, 5-10, 12-14
 Shale crescent, 223, 224
 Sheet floods, 221, 231, 233
 Shelf deposits, 95, 96, 104
 Similar process—similar structures assemblage principles, 233-236
 Size histogram, 220, 221, 229
 Skewness, 228, 229
 Spasmodic sedimentation, 225
 Suspension transport, 227-229, 233
 Tabular sandstone, 227
 Tidal currents, 85, 95, 96
 Triassic, 160, 168, 213, 265, 267-271, 273, 274, 285, 288, 291-295, 300, 301
 Turbidites, 1, 213, 221, 225, 231, 232, 235, 249
 Turbidity currents, 213, 214, 225, 232, 233, 235, 288, 289
 Volcanics, 187, 188, 194, 280, 291-293
 Wamsutta
 Conglomerates, 215-217
 Formation, 180-184, 187, 188, 191-194, 212, 214, 215, 218, 219, 222, 223, 227, 233, 235
 sandstones, 215-218
 siltstone, 215-217
 Wavy lamination, 218, 226
