Cover: This 3D figure incorporates seminal components of many of the papers in this volume. The workflow from limited outcrop studies to well bore data, including core and core to log studies, is inherent in most of the papers. As resource-driven drilling increases data availability, our knowledge increases. Penetrations of the number 1 and 2 oil-producing formations (Niagaran and Dundee) in the state represent the linkage among resource, data, modern analysis techniques, and geological knowledge and hence better exploitation in a famous basin. Contents

<i>Acknowledgments</i>	v
1. Introduction to the Paleozoic stratigraphy and resources of the Michigan Basin	1
G. Michael Grammer, William B. Harrison III, David A. Barnes, and Peter Voice	
2. Regional reservoir characterization of the Ordovician Upper St. Peter Sandstone, Michigan Basin, USA	9
Stephen Zdan and David A. Barnes	
3. Geological characterization and assessment of confining layer potential of the Upper Ordovician Utica Shale, Michigan Basin, USA	35
Frank R. Sattler and David A. Barnes	
4. A reevaluation of the Burnt Bluff Group (Llandovery, Silurian, Michigan Basin) from subsurface and outcrop data: Development of a time-transgressive depositional model	55
P.J. Voice, W.B. Harrison III, and G.M. Grammer	
5. Utilizing sequence stratigraphy to develop a depositional model for Silurian (Niagaran) reefs in the Michigan Basin	81
Audrey Ritter and G. Michael Grammer	
6. Rock-based 3-D reservoir characterization of a Silurian (Niagaran) reef—Ray gas storage field, Macomb County, Michigan	105
Jessica L. Wold and G. Michael Grammer	
7. Windward vs. leeward variability of faunal distribution in a Silurian (Wenlockian) pinnacle reef complex—Ray Reef, Macomb County, Michigan	131
Jennifer L. Trout, G. Michael Grammer, and William B. Harrison III	
8. Porosity characterization in a Silurian reef, northern Michigan Basin, using azimuthal seismic data and potential impacts for enhanced oil recovery	157
Brian Toelle and Yuriy Vladimirov Ganshin	
9. A new sequence stratigraphic model for the Silurian A-1 Carbonate (Ruff Formation) of the Michigan Basin	175
Matthew J. Rine, Stephen E. Kaczmarek, and Jonathan D. Garrett	
10. Evaporite facies of the Michigan Basin	197
William B. Harrison III and Peter J. Voice	
11. Middle Devonian Sylvania Sandstone, Michigan Basin, USA	217
Katherine Pollard, Farsheed Rock, and David A. Barnes	

12. Utilization of modern and ancient analogs to constrain 3-D geostatistical models, Devonian of South Buckeye field, Michigan Basin	257
Shawn M. McCloskey and G. Michael Grammer	
13. Controls on stratigraphy and sedimentation of the Mississippian Marshall Formation, Michigan Basin, USA	287
Joseph G. Adducci and David A. Barnes	
14. Late Mississippian (Chesterian) through early Pennsylvanian (Atokan) strata, Michigan Basin, USA	309
Shannon M. Towne, Niah B.H. Venable, and David A. Barnes	
15. Pennsylvanian Pewamo Formation and Haybridge strata of central Michigan: The youngest rocks of the Michigan Basin?	331
Kathleen C. Benison
