## Acknowledgments

Dr. Donald E. Hattin, Indiana University, directed the Ph.D dissertation on which this paper is based and had done much of the field work prior to the author's initial efforts. Dr. William T. Fox, Williams College, Massachusetts, discussed with the author his classification for rocks of the Richmond Group and accompanied him during visits to several Indiana localities where the Saluda Formation is exposed. Mrs. Ruth G. Browne, Louisville, Kentucky, provided information regarding several Saluda exposures in Kentucky. Mr. Edmund Nosow, then of the Kentucky Geological Survey, made known to the author two Saluda exposures in Nelson County, Kentucky, and directed him to well samples of Upper Ordovician rocks in Kentucky. The author extends thanks for the help tendered by each of these individuals. Finally, financial aid in the form of fellowships provided by the National Science Foundation is gratefully acknowledged.
