REVIEWS
Hemodynamic Consequences of Changes in Microvascular Structure
Dumamo Razzari, Claudia Agabiti-Rosei, and Enrico Agabiti-Rosei

Hypertensive Cardiovascular Risk: Pulsatile Hemodynamics, Gender, and Therapeutic Implications
Michel E. Safar and Harold Smulyan

EXERCISE
Effects of Lifestyle Modification on an Exaggerated Blood Pressure Response to Exercise in Normotensive Females
Rymeia Michibba, Masanori Ohita, Masaharu Ikeda, Ying Jiang, and Hiroshi Yamato

EPIDEMOLOGY
Current Trends of Hypertension Treatment in the United States
Shreya J. Shah and Randall S. Stafford

Antihypertensive Adherence Trajectories Among Older Adults in the First Year After Initiation of Therapy

GENETICS
Association Study of Common Variants in PFN1 With Hypertension in a Han Chinese Population: A Case-Control Study and a Follow-up Study
Song Yang, Yanchun Chen, Chunlan Liu, Xianghai Zhao, Qian Zhuang, Junxiang Sun, Pengfei Wei, Hailong Zhao, Xiaotian Chen, and Chong Shen

DIABETES AND METABOLIC SYNDROME
Nocturnal but not Diurnal Hypertension Is Associated to Insulin Resistance Markers in Subjects With Normal or Mildly Elevated Office Blood Pressure

PEDIATRICS
Ambulatory Blood Pressure Control in Children and Young Adults After Kidney Transplantation

ORIGINAL CONTRIBUTIONS
BLOOD VESSELS
Association Between Short-Term Systolic Blood Pressure Variability and Carotid Intima-Media Thickness in ELSA-Brasil Baseline
Adela H. Ribeiro, Paulo A. Lottulu, Andre Fuitta, Alessandra C. Goulart, Dora Chor, Jose O. MR, Isabel M. Bensanor, and Itamar S. Santos

BP MEASUREMENT
The Reproducibility of Racial Differences in Ambulatory Blood Pressure Phenotypes and Measurements
Aumer Husain, Feng-Chang Lin, Laura A. Tottle, Emily Olsson, and Anthony J. Viera

Mid-Term Blood Pressure Variability Is Associated With Clinical Outcome After Ischemic Stroke
Yiwei Wang, Jin X. Wang, P. Mag, Na Liu, Niu Ji, Guanghui Zhang, Binggao Xu, Yinxu Zhou, Yong’an Sun, Yingda Xu, Ruita Hui, and Ming Ji

Measurement Repeatability of Central and Peripheral Blood Pressures: The ARIC Study
Fren Yon, Gendaro Hata, David Cooper, Michelle L. Meyer, Susan Cheng, and Hirofumi Tanaka

Ambulatory Pulse Pressure Predicts the Development of Left Ventricular Diastolic Dysfunction in Over 20 Years of Follow-up

Using Carbon Monoxide Releasing Molecules in Models of Preeclampsia: When Should We Be Monitoring Vascular Effects?
Karalyn E. McRae and Graeme N. Smith

Response to: Using Carbon Monoxide Releasing Molecules in Models of Pre-Eclampsia: When Should We Be Monitoring Vascular Effects?
Eric M. George and Joey P. Granger

ABSTRACTS FROM THE CHINESE JOURNAL OF HYPERTENSION

The Relationship Between Orthostatic Hypotension and White Matter Lesions in Patients With Hypertension
Yun He and Qiu-min Qu

The Relationship Between Neutrophil to Lymphocyte Ratio and Incidence of Nonfatal Cardiovascular Events in Elderly Male Hypertensive Patients
Xiao-nan Sun, Lei-ming Luo, Ping Ye, Xiao-juan Zhao, Jin Zheng, and Run-xue Du

SCOPE

The American Journal of Hypertension is a monthly, peer-reviewed journal that provides a forum for scientific inquiry of the highest standards in the field of hypertension and related cardiovascular disease. The journal publishes high-quality original research and review articles on basic sciences, molecular biology, clinical and experimental hypertension, cardiology, epidemiology, pediatric hypertension, endocrinology, neurophysiology, and nephrology.

NEW PUBLICATION MODEL

- Advance Articles are published online before they appear in a regular issue of the journal. Beginning in August of 2017, articles will first be published as PDFs of the original peer-reviewed author files in order to facilitate rapid access to new content. (Note that this does not apply to editorials or errata.) These files will not be copyedited or typeset. They will contain the watermark “Accepted Manuscript.”
- Once an article has been edited, typeset, and finalized, the new version will replace the previous version on the Advance Articles page. Articles will be removed from the Advance Articles page once the issue in which they are published has been posted online.
- Accepted manuscripts will be posted online only after the license to publish has been signed; failure to sign the license will result in a delay in online publication.

SEEKING OPINION SUBMISSIONS

- Opinion pieces typically provide insight to the readers about specific topics of current major or “burning” interest or invite controversy in hypertension and associated cardiovascular disease.
- There is a word limit of 1000 words, 5 references and 1 figure or table.
