Editorial

275 Obesity—still highly heritable after all these years. SK Musani, S Erickson, and DB Allison
See corresponding article on page 398.

277 Is there a new component of the Mediterranean diet that reduces inflammation? SH Zeisel
See corresponding article on page 424.

Commentaries

279 Estimating activity energy expenditure: how valid are physical activity questionnaires? HK Neilson, PJ Robson, CM Friedenreich, and I Csizmadi

292 The choice of cutoffs for obesity and the effect of those values on risk factor estimation. AM Toschke, BM Kurth, and R von Kries

Original Research Communications

Obesity and eating disorders

295 Increased fat accumulation in liver may link insulin resistance with subcutaneous abdominal adipocyte enlargement, visceral adiposity, and hypoadiponectinemia in obese individuals. J Koska, N Stefan, PA Permana, C Weyer, M Sonoda, C Bogardus, SR Smith, DR Joannisie, T Funahashi, J Krakoff, and JC Bunt

303 A novel interaction between dietary composition and insulin secretion: effects on weight gain in the Quebec Family Study. J-P Chaput, A Tremblay, EB Rimm, C Bouchard, and DS Ludwig

310 Sleep duration, general and abdominal obesity, and weight change among the older adult population of Spain. E López-García, R Faubel, L León-Muñoz, MC Zuluaga, JR Banegas, and F Rodríguez-Artalejo

Cardiovascular disease risk

323 Favorable effects of berry consumption on platelet function, blood pressure, and HDL cholesterol. I Erlund, R Koli, G Alfthan, J Marniemi, P Puukka, P Mustonen, P Mattila, and A Jula

Nutritional status, dietary intake, and body composition

332 Ability of new octapolar bioimpedance spectroscopy analyzers to predict 4-component–model percentage body fat in Hispanic, black, and white adults. AL Gibson, JC Holmes, RL Desautels, LB Edmonds, and L Nuudi

Carbohydrate metabolism and diabetes

339 Low-carbohydrate-diet score and risk of type 2 diabetes in women. TL Halton, S Liu, JE Manson, and FB Hu

347 Effect of dietary n–3 polyunsaturated fatty acids on plasma total and high-molecular-weight adiponectin concentrations in overweight to moderately obese men and women. M Kratz, MM Swarbrick, HS Callahan, CC Matthias, PJ Havel, and DS Weigle

354 Interstitial glucose profile associated with symptoms attributed to hypoglycemia by otherwise healthy women. EJ Simpson, M Holdsworth, and IA Macdonald

Vitamins, minerals, and phytochemicals

362 Vitamin status in morbidly obese patients: a cross-sectional study. ET Aasheim, D Hofso, J Hjelmesæth, KI Birkeland, and T Bohmer

370 Randomized controlled trial of the effect of selenium supplementation on thyroid function in the elderly in the United Kingdom. MP Rayman, AJ Thompson, B Bekaeft, J Catterick, R Galassini, E Hall, M Warren-Perry, and GJ Beckett

379 Brazil nuts: an effective way to improve selenium status. CD Thomson, A Chisholm, SK McLachlan, and JM Campbell
385 Vitamin D receptor genotypes influence quadriceps strength in chronic obstructive pulmonary disease. NS Hopkinson, KW Li, A Kehoe, SE Humphries, M Roughton, J Moxham, H Montgomery, and MI Polkey

Pregnancy and lactation
391 Homocysteine concentration, related B vitamins, and betaine in pregnant women recruited to the Seychelles Child Development Study. JMW Wallace, MP Bonham, J Strain, EM Duffy, PJ Robson, M Ward, H McNulty, PW Davidson, GJ Myers, CF Shamlaye, TW Clarkson, AM Molloy, JM Scott, and PM Ueland

Growth, development, and pediatrics
398 Evidence for a strong genetic influence on childhood adiposity despite the force of the obesogenic environment. J Wardle, S Carrell, CMA Haworth, and R Plomin
See corresponding editorial on page 275.

Digestive and liver diseases
405 Sensitive detection of cereal fractions that are toxic to celiac disease patients by using monoclonal antibodies to a main immunogenic wheat peptide. B Morón, Á Cebolla, H Manyani, M Álvarez-Maqueda, M Megiás, M del Carmen Thomas, MC López, and C Sousa

Nutritional epidemiology and public health
424 Dietary choline and betaine intakes in relation to concentrations of inflammatory markers in healthy adults: the ATTICA study. P Detopoulou, DB Panagiotakos, S Antonopoulou, C Pitsavos, and C Stefanadis
See corresponding editorial on page 277.

431 Vitamin D status in kidney transplant patients: need for intensified routine supplementation. B Ewers, A Garsbjerg, C Moelgaard, AM Frederiksen, and P Marckmann

438 Child malnutrition and mortality among families not utilizing adequately iodized salt in Indonesia. RD Sembra, S de Pee, SY Hess, K Sun, M Sari, and MW Bloem

Bone metabolism
455 Calcium supplementation and bone mineral accretion in adolescent girls: an 18-mo randomized controlled trial with 2-y follow-up. HL Lambert, R Eastell, K Karnik, JM Russell, and ME Barker

463 Erratum

Supplement: The Science of Botanical Supplements for Human Health
471S Introduction to the National Institutes of Health Botanical Research Centers Program. CA Swanson and Q-Y Liu

472S Evaluation of botanicals for improving human health. DM Ribnicky, A Poulev, B Schmidt, WT Cefalu, and I Raskin

476S Technologies and experimental approaches at the National Institutes of Health Botanical Research Centers. S Barnes, DF Birt, BR Cassileth, WT Cefalu, FH Chilton, NR Farnsworth, I Rashkin, RB van Breemen, and CM Weaver

481S Botanicals and the metabolic syndrome. WT Cefalu, J Ye, A Zuberi, DM Ribnicky, I Raskin, Z Liu, ZQ Wang, PJ Brantley, L Howard, and M Lefevre

488S Echinacea in infection. DF Birt, MP Widrlechner, CA LalLone, L Wu, J Bae, AKS Solco, GA Kraus, PA Murphy, ES Wurtele, Q Leng, SC Hebert, WJ Maury, and JP Price

493S Botanicals for age-related diseases: from field to practice. CM Weaver, S Barnes, JM Wyss, H Kim, DM Morré, DJ Morré, JE Simon, MA Lila, EM Janle, and MG Ferruzzi

498S Mechanisms by which botanical lipids affect inflammatory disorders. FH Chilton, LL Rudel, JS Parks, JP Arm, and MC Seeds

504S The University of Illinois at Chicago/National Institutes of Health Center for Botanical Dietary Supplements Research for Women’s Health: from plant to clinical use. NR Farnsworth, EC Krause, JL Bolton, GF Pauli, RB van Breemen, and JG Graham

509S Ensuring the safety of botanical dietary supplements. RB van Breemen, HHS Fong, and NR Farnsworth
