Contents

Review Papers

Legal & ethical compliance when sharing biospecimen
Tomas Klingstrom, Erik Bongcam-Rudloff and Jane Reichel ........................................ 1

The genomic basis of nematode parasitism
Mark Viney ............................................................................................................. 8

Novel molecules lncRNAs, tRFs and circRNAs deciphered from next-generation sequencing/RNA sequencing: computational databases and tools
A. Saleembhasha and Seema Mishra .................................................................. 15

Genetic transformation of cell-walled plant and algae cells: delivering DNA through the cell wall
Mario Fernando Ortiz-Matamoros, Marco A. Villanueva and Tania Islas-Flores ............... 26

A systems-level analysis of drug–target–disease associations for drug repositioning
Kayleigh D. Rutherford, Gaston K. Mazandu and Nicola J. Mulder .............................. 34

Array probe density and pathobiological relevant CpG calling bias in human disease and physiological DNA methylation profiling
Guillermo A. Silva-Martı´nez, Silvio Zaina and Gertrud Lund ......................................... 42

Epigenetic regulation of gene expression in cancer: techniques, resources and analysis

A brief review of single-cell transcriptomic technologies
Tomer Kalisky, Sarit Oriel, Tali Hana Bar-Lev, Nissim Ben-Haim, Ariel Trink, Yishay Wineberg, Itamar Kanter, Shlomit Gilad and Saumyadipta Pyne .................................................. 64
