In Memoriam

435 Stanley Norton Gershoff, PhD, 1924–2017. AH Lichtenstein

Editorials

437 Modulation of receptor signaling by metabolic environment. MD Johnson and TH Moran
See corresponding article on page 447.

439 Fructose: back to the future? JL Sievenpiper
See corresponding articles on pages 506 and 519.

443 Diet, height, and health. J Yeboah
See corresponding articles on pages 589 and 597.

445 Enduring challenges in estimating the effect of the food environment on obesity. S Cummins, C Clary, and M Shareck
See corresponding article on page 603.

Original Research Communications

Obesity and eating disorders

447 Cholecystokinin responsiveness varies across the population dependent on metabolic phenotype. AJ Desai, M Dong, BT Langlais, AC Dueck, and LJ Miller
See corresponding editorial on page 437.

Lipids

467 Metabolism of uniformly labeled 13C-eicosapentaenoic acid and 13C-arachidonic acid in young and old men. P Lévéillé, R Chouinard-Watkins, A Windust, P Lawrence, SC Cunnane, JT Brenna, and M Plourde

Cardiovascular disease risk

475 Lower systolic blood pressure at age 7 y in low-birth-weight children who received iron supplements in infancy: results from a randomized controlled trial. J Lindberg, M Norman, B Westrup, M Domelid, and SK Berglund

Nutritional status, dietary intake, and body composition

481 Daily supplementation with 15 μg vitamin D3 compared with vitamin D2 to increase wintertime 25-hydroxyvitamin D status in healthy South Asian and white European women: a 12-wk randomized, placebo-controlled food-fortification trial. L Tripkovic, LR Wilson, K Hart, S Johnsen, S de Lusignan, CP Smith, G Buca, S Pensom, G Chope, R Elliott, E Hyppönen, JL Berry, and SA Lanham-New

491 Associations of infant feeding with trajectories of body composition and growth. KA Bell, CL Wagner, HA Feldman, RJ Shypalo, and MB Belfort
Pretreatment fasting plasma glucose and insulin modify dietary weight loss success: results from 3 randomized clinical trials. MF Hjorth, C Ritz, EE Blaak, WHM Saris, D Langin, SK Poulsen, TM Larsen, TIA Sørensen, Y Zohar, and A Astrup

Carbohydrate metabolism and diabetes

Fructose replacement of glucose or sucrose in food or beverages lowers postprandial glucose and insulin without raising triglycerides: a systematic review and meta-analysis. RA Evans, M Frese, J Romero, JH Cunningham, and KE Mills
See corresponding editorial on page 439.

Chronic fructose substitution for glucose or sucrose in food or beverages has little effect on fasting blood glucose, insulin, or triglycerides: a systematic review and meta-analysis. RA Evans, M Frese, J Romero, JH Cunningham, and KE Mills
See corresponding editorial on page 439.

Vitamins, minerals, and phytochemicals

Modeled changes in US sodium intake from reducing sodium concentrations of commercially processed and prepared foods to meet voluntary standards established in North America: NHANES. ME Cogswell, SM Patel, K Yuan, C Gillespie, W Juan, CJ Curtis, M Vigneault, J Clapp, P Roach, A Mosshmeg, J Ahuja, P Pehrsson, L Brookmire, and R Merritt

Pregnancy and lactation

Adequacy of nutritional intake from food and supplements in a cohort of pregnant women in Québec, Canada: the 3D Cohort Study (Design, Develop, Discover). L Dubois, M Diasparra, B Bédard, CK Colapinto, B Fontaine-Bisson, A-S Morisset, RE Tremblay, and WD Fraser

Growth, development, and pediatrics

Follow-up of a randomized trial on postdischarge nutrition in preterm-born children at age 8 y. CA Ruys, M van de Lagemaat, MJF Finken, and NH Lefaever

An observational cohort study of weight- and length-derived anthropometric indicators with body composition at birth and 5 mo: the Healthy Start study. W Perng, BM Ringham, DH Glueck, KA Sauder, AP Starling, MB Belfort, and D Dabelea

Digestive and liver diseases

Higher dietary cholesterol and n-3 fatty acid intakes are associated with a lower success rate of Helicobacter pylori eradication therapy in Japan. H Ikezaki, N Furusyo, PF Jacques, M Shimizu, M Murata, EJ Schaefer, Y Urita, and J Hayashi

Nutritional epidemiology and public health

Adult height, dietary patterns, and healthy aging. W Ma, KA Hagan, Y Heianza, Q Sun, EB Rimm, and L Qi
See corresponding editorial on page 443.

Association between noncow milk beverage consumption and childhood height. M-E Morency, CS Birken, G Lebovic, Y Chen, M L’Abbé, GJ Lee, and JL Maguire, and the TARGt Kids! Collaboration
See corresponding editorial on page 443.

Higher densities of fast-food and full-service restaurants are not associated with obesity prevalence. M Mazidi and JR Speakman
See corresponding editorial on page 445.

Artificially sweetened beverages, sugar-sweetened beverages, plain water, and incident diabetes mellitus in postmenopausal women: the prospective Women’s Health Initiative observational study. M Huang, A Quddus, L Stinson, JM Shikany, BV Howard, RM Kutob, B Lu, JE Manson, and CB Eaton

Maternal protein intake in pregnancy and offspring metabolic health at age 9–16 y: results from a Danish cohort of gestational diabetes mellitus pregnancies and controls. E Maslova, S Hansen, LG Grunnet, M Stram, AA Bjerregaard, L Hjort, FB Kampmann, CM Madsen, AC Baum Thuesen, BH Bech, TI Halldorsson, AA Vaag, and SF Olsen

Nutritional metabolomics and breast cancer risk in a prospective study. MC Playdon, RG Ziegler, JN Sampson, R Stolzenberg-Solomon, HJ Thompson, ML Irwin, ST Mayne, RN Hoover, and SC Moore

Dietary fat intake and risk of non-Hodgkin lymphoma in 2 large prospective cohorts. KA Bertrand, E Giovannucci, BA Rosner, SM Zhang, F Laden, and BM Birmann
International nutrition

657 Effect of a package of health and nutrition services on sustained recovery in children after moderate acute malnutrition and factors related to sustaining recovery: a cluster-randomized trial. HC Stobaugh, LB Bollinger, SE Adams, AH Crocker, JB Grise, JA Kennedy, C Thakwalakwa, KM Maleta, DJ Dietzen, MJ Manary, and I Trehan

667 Randomized controlled trial assessing the efficacy of a reusable fish-shaped iron ingot to increase hemoglobin concentration in anemic, rural Cambodian women. AI Rappaport, KC Whitfield, GE Chapman, RY Yada, KM Kheang, J Louise, AJ Summerlee, GR Armstrong, and TJ Green

Dietary supplements

675 Tolerance to increased supplemented dietary intakes of methionine in healthy older adults. NEP Deutz, SY Simbo, GC Ligthart-Melis, L Cynober, M Smriga, and MPKJ Engelen

684 Protein supplements after weight loss do not improve weight maintenance compared with recommended dietary protein intake despite beneficial effects on appetite sensation and energy expenditure: a randomized, controlled, double-blinded trial. L Kjølbæk, LB Sørensen, NB Søndertoft, CK Rasmussen, JK Lorenzen, A Serena, A Astrup, and LH Larsen

Letters to the Editor

698 Vitamin D and dementia risk: the cause and consequence story. Y Mao and H Yu

698 Reply to Y Mao and H Yu. L Byberg, E Olsson, B Karlström, T Cederholm, H Melhus, P Sjögren, and L Kilander

699 Vitamin D and incident dementia and cognitive impairment. WB Grant

700 Reply to WB Grant. L Byberg, E Olsson, B Karlström, T Cederholm, H Melhus, P Sjögren, and L Kilander

701 Modulation of postprandial glycemic responses by noncarbohydrate nutrients provides novel approaches to the prevention and treatment of type 2 diabetes. D Tricò and A Natali

702 Reply to D Tricò and A Natali. H Meng, NR Matthan, and AH Lichtenstein

702 Muscle adjustment methods may affect the association of muscle mass with novel dietary protein food clusters. G Bahat and MA Karan

703 Reply to G Bahat and MA Karan. KM Mangano, S Sahni, DP Kiel, KL Tucker, AB Dufour, and MT Hannan

704 Effect of macronutrients on the glycemic index. TMS Wolever

705 Reply to TMS Wolever. H Meng, NR Matthan, and AH Lichtenstein

706 Gaskins et al. study reports on a new opportunity for breast cancer prevention. AT Wijayabahu

707 Reply to AT Wijayabahu. AJ Gaskins, C Corvalan, and KB Michels (on behalf of the authors)

Errata

708 Erratum for Maki et al. Consumption of a cranberry juice beverage lowered the number of clinical urinary tract infection episodes in women with a recent history of urinary tract infection. Am J Clin Nutr 2016;103:1434–42.

From the American Society for Nutrition
