EDITORIALS

A new strategy to decrease cardiac injury in aged heart following ischaemia-reperfusion: enhancement of the interaction between AMPK and SIRT1
Q. Chen and E. J. Lesnefsky 771

Cardioprotection - is no the answer? A renewed look at nitric oxide signalling in cardiomyocytes
S. M. Davidson and D. M. Yellon 773

Taking the right ventricle to ‘task’ in pulmonary hypertension: role of TASK1/KCNK3 in RV dysfunction
K. R. Chaudhary and D. J. Stewart 776

MicroRNAs in cardiomyocyte differentiation and maturation
E. A. Alfar, A. El-Armouche, and K. Guan 779

REVIEWS

Pathophysiological understanding of HFpEF: microRNAs as part of the puzzle
M. Rech, A. Barandiaran Aizpurua, V. van Empel, M. van Bilsen, and B. Schroen 782

Slit-Robo signalling in heart development
J. Zhao and M. T. M. Mommersteeg 794

ORIGINAL ARTICLES

Cardiac disease and heart failure

Cardiomyocyte-specific deletion of Sirt1 gene sensitizes myocardium to ischaemia and reperfusion injury
L. Wang, N. Quan, W. Sun, X. Chen, C. Cates, T. Rousselle, X. Zhou, X. Zhao, and J. Li 805

Cardioprotection by ischemic postconditioning and cyclic guanosine monophosphate-elevating agents involves cardiomyocyte nitric oxide-sensitive guanylyl cyclase

Critical role of phosphodiesterase 2A in mouse congenital heart defects

Biomechanical defects and rescue of cardiomyocytes expressing pathologic nuclear lamins

Over-expression of mitochondrial creatine kinase in the murine heart improves functional recovery and protects against injury following ischaemia-reperfusion

Immunity and Inflammation

Vitamin D receptor restricts T helper 2-biased inflammation in the heart

Pulmonary circulation

Loss of KCNK3 is a hallmark of RV hypertrophy/dysfunction associated with pulmonary hypertension

Omics
Integrated transcriptomic and regulatory network analyses identify microRNA-200c as a novel repressor of human pluripotent stem cell-derived cardiomyocyte differentiation and maturation

Vascular biology
Targeted endothelial gene deletion of triggering receptor expressed on myeloid cells-1 protects mice during septic shock
L. Jolly, K. Carrasco, M. Derive, J. Lemarié, A. Boufenzer, and S. Gibot 907

Retraction
Transplantation of brown adipose tissue inhibits atherosclerosis in apoE−/− mice: contribution of the activated FGF-21-adiponectin axis

Cardiovascular Research Onlife

Spotted by the Scientists of Tomorrow
Epigenetic control of lipid metabolism: implications for lifespan and healthspan
G. G. Schiattarella and J. A. Hill e33

Clinical Commentaries: Focus on Monitoring Cardiac Injury
High-sensitivity troponin: a barometer for cardiac health
K. K. Lee and N. L. Mills e36

The future of myocardial injury biomarkers in cardiovascular disease: looking beyond cardiac troponins
M. Marber e39

Editors’ Corner
Trained immunity and cardiovascular disease: is it time for translation to humans?
G. D. Norata e41

Scientists on the Spot
Dr Giacomo Rossitto interviews Professor Rhian Touyz, on the translational applications of vascular smooth muscle cell biology in cardiovascular disease
G. Rossitto and R. Touyz e43

Conference Report
The American College of Cardiology 2018; a Starbuckian ODYSSEY and a Black Barbershop
M. J. Daniels e44
