FEMS PATHOGENS AND DISEASE

VOLUME 73, NUMBER 1
FEBRUARY 2015

Contents

Editorial
Editorial: New insights into Chlamydia: from genes to diseases in humans and animals

Research Articles
Target cell limitation constrains chlamydial load in persistent infections: results from mathematical modelling applied to mouse genital tract infection data
Andrew P. Craig, Roger G. Rank, Anne K. Bowlin, Handan Wand and David P. Wilson

A bovine model of a respiratory Parachlamydia acanthamoebae infection
Markus Lohr, Annette Prohl, Carola Ostermann, Elisabeth Liebler-Tenorio, Wieland Schroedl, Sébastien Aeby, Gilbert Greub and Petra Reinhold

Evaluation of antimicrobial treatment in a bovine model of acute Chlamydia psittaci infection: tetracycline versus tetracycline plus rifampicin
Annette Prohl, Markus Lohr, Carola Ostermann, Elisabeth Liebler-Tenorio, Angela Berndt, Wieland Schroedl, Michael Rothe, Evelyn Schubert, Konrad Sachse and Petra Reinhold

Prevalence and diversity of Chlamydiales in Swiss ruminant farms
Margaux Dreyer, Sébastien Aeby, Anna Oevermann and Gilbert Greub

Temperature and host cell-dependent changes in virulence of Chlamydia pneumoniae CWL029 in an optimized mouse infection model
Katrin Janik, Jenny Bode, Pavel Dutow, Robert Laudeley, Robert Geffers, Kirsten Sommer, Silke Glage and Andreas Klos

Minireviews
Chlamydia psittaci: update on an underestimated zoonotic agent
Michael R. Knittler and Konrad Sachse

Twenty years of research into Chlamydia-like organisms: a revolution in our understanding of the biology and pathogenicity of members of the phylum Chlamydiae
Alyce Taylor-Brown, Lloyd Vaughan, Gilbert Greub, Peter Timms and Adam Polkinghorne

Commentary
Two more species of Chlamydia—does it make a difference?
Konrad Sachse and Karine Laroucau

Research Article
Chlamydia psittaci in ducks: a hidden health risk for poultry workers
Fabien Vorimore, Anne Thébault, Sonia Poisson, Didier Cléva, Joseph Robineau, Bertille de Barbeyrac, Benoît Durand and Karine Laroucau

Short Communication
A mouse model for Chlamydia suis genital infection
Manuela Donati, Maria Di Paolo, Alison Favaroni, Rita Aldini, Antonietta Di Francesco, Fabio Ostanello, Roberta Biondi, Eleonora Cremonini, Laura Ginocchietti and Roberto Cevenini
Infection with *Chlamydia pneumoniae* as a cause of coronary heart disease: the hypothesis is still untested
J. Thomas Grayston, Robert J. Belland, Gerald I. Byrne, Cho Chou Kuo, Julius Schachter, Walter E. Stamm and Guangming Zhong

Andrographolide inhibits intracellular *Chlamydia trachomatis* multiplication and reduces secretion of proinflammatory mediators produced by human epithelial cells
Ziyu Hua, Kyla M. Frohlich, Yan Zhang, Xiaogeng Feng, Jiaxing Zhang and Li Shen

Induction and inhibition of CPAF activity during analysis of *Chlamydia*-infected cells
Kirsten A. Johnson, Jennifer K. Lee, Allan L. Chen, Ming Tan and Christine Sütterlin

NOD1 in contrast to NOD2 functional polymorphism influence *Chlamydia trachomatis* infection and the risk of tubal factor infertility
Ivan Branković, Eleanne F. van Ess, Marlies P. Noz, Wilhelmina (Anke) J. Wiericx, Joke Spaargaren, Servaas A. Morré and Sander Ouburg

Genomic variant representation in a *Chlamydia* population is dynamic and adaptive with dependence on in vitro and in vivo passage

Host preference and zoonotic potential of *Chlamydia psittaci* and *C. gallinacea* in poultry
Virginie Hulin, Sabrina Oger, Fabien Vorimore, Rachid Aaziz, Bertille de Barbeyrac, Jacques Berruchon, Konrad Sachse and Karine Laroucau
