EDITORIALS

KLF6 orchestrates cardiac myocyte-to-fibroblast communication: ‘He who has ears to hear, let him hear’
J.-L. Balligand

Platelets and thromboxane receptors: pivotal players in arteriogenesis
V.W.M. Van Hinsbergh and D. Tasev

Micro(RNA) management of smooth muscle cell phenotype and response to vascular injury
R.A. Mcdonald, K. Pinel, and A.H. Baker

Keep calm and carry on: miR-1298 prevents up-regulation of Cx43 and secures a quiescent vascular smooth muscle cell
K. Schmidt and C. de Wit

REVIEW

Netrin-1 as a novel therapeutic target in cardiovascular disease: to activate or inhibit?
K. Layne, A. Ferro, and G. Passacquale

ORIGINAL ARTICLES

Cardiac biology and remodelling

Modulation of cardiac fibrosis by Krüppel-like factor 6 through transcriptional control of thrombospondin 4 in cardiomyocytes

Dermcidin: a skeletal muscle myokine modulating cardiomyocyte survival and infarct size after coronary artery ligation

Ultrastructure of the intercellular space in adult murine ventricle revealed by quantitative tomographic electron microscopy
A. Leo-Macias, F.-X. Liang, and M. Delmar

Mitochondrial complex I defect and increased fatty acid oxidation enhance protein lysine acetylation in the diabetic heart
E.J. Vazquez, J.M. Berthiaume, O. Achike, E. Buchanan, M.M. Montano, M.P. Chandler, M. Miyagi, and M.G. Rosca

Identification and characterization of two ankyrin-B isoforms in mammalian heart

Rip2 modifies VEGF-induced signalling and vascular permeability in myocardial ischaemia

Extracellular component hyaluronic acid and its receptor Hmmr are required for epicardial EMT during heart regeneration
M.A. Missinato, K. Tobita, N. Romano, J.A. Carroll, and M. Tsang

Tolerance to ischaemic injury in remodelled mouse hearts: less ischaemic glycogenolysis and preserved metabolic efficiency
W.G.T. Masoud, O. Abo Al-Rob, Y. Yang, G.D. Lopaschuk, and A.S. Clanachan

Vascular biology
Thromboxane A2 induces blood flow recovery via platelet adhesion to ischaemic regions

Down-regulation of miR-23b induces phenotypic switching of vascular smooth muscle cells in vitro and in vivo

MicroRNA-1298 is regulated by DNA methylation and affects vascular smooth muscle cell function by targeting connexin 43

The cAMP-producing agonist beraprost inhibits human vascular smooth muscle cell migration via exchange protein directly activated by cAMP

Cross-talk between LOX-1 and PCSK9 in vascular tissues

Cannabinol causes endothelium-dependent vasorelaxation of human mesenteric arteries via CB1 activation
C.P. Stanley, W.H. Hind, C. Tufarelli, and S.E. O’Sullivan

Aggravated restenosis and atherogenesis in ApoCIII transgenic mice but lack of protection in ApoCIII knockouts: the effect of authentic triglyceride-rich lipoproteins with and without ApoCIII
H. Li, Y. Han, R. Qi, Y. Wang, X. Zhang, M. Yu, Y. Tang, M. Wang, Y.-N. Shu, W. Huang, X. Liu, B. Rodrigues, M. Han, and G. Liu

Cystathionine γ-lyase regulates arteriogenesis through NO-dependent monocyte recruitment
G.K. Kolluru, S.C. Bir, S. Yuan, X. Shen, S. Pardue, R. Wang, and C.G. Kevil

Ion channels and arrhythmias
Forced fusion of human ventricular scar cells with cardiomyocytes suppresses arrhythmogenicity in a coculture model

A new KCNQ1 mutation at the S5 segment that impairs its association with KCNE1 is responsible for short QT syndrome
