Methodology Used to Update the Gasoline Volatility Schedule for U.S. Seasonal and Geographic Classes

Technical Report TR4

Methodology Used to Update the Gasoline Volatility Schedule for U.S. Seasonal and Geographic Classes

This document was prepared by a team of stakeholders from the Volatility Task Force of ASTM Subcommittee D02.A, under Technical Committee D02 on Petroleum Products, Liquid Fuels, and Lubricants.

ASTM STOCK NUMBER: TR4-EB
DOI: 10.1520/TR4-EB

Contents

1. Executive Summary	1
2. Acknowledgments	2
3. Introduction	2
4. Importance of Proper Volatility for Vehicle Performance	3
5. The United States Has Wide Variation in Weather Conditions Requiring Variable Volatility for Gasoline	4
6. Metrics Used for Volatility Measurement and Control	4
7. Historic Background on Volatility Schedule	6
8. Metrics and Process for Temperature Limits from Weather Data for Selection of Volatility Classes	9
9. Assumptions and Protocols of the Task Force Used to Determine Volatility Class Changes in ASTM D4814, Table 4	10
10. Identifying Potential Changes in the Volatility in ASTM D4814, Table 4	13
11. Making Changes in ASTM D4814, Table 4	17
12. Conclusions: The Revisions in ASTM D4814, Table 4	17
13. Recommendations	17
References	18
Appendix 1: Original Participants in ASTM Task Force Revising ASTM D4814, Table 4	19
Appendix 2: ASTM D4814-21c, Table 4	20
Appendix 3: Understanding How Ambient Temperature Is Used to Set Volatility Limits in ASTM D4814	24
Appendix 4: Changes to Update ASTM D4814, Table 4	27
Appendix 5: Explanations and Technical Basis for Changes in ASTM D4814, Table 4	43
Appendix 6: Changes to ASTM D4814, Section 5, and ASTM D4814, Table 4, the Volatility Schedule, Including Wording Changes to the Footnotes	48
