EAAP is the International Federation of Animal Science for Europe and the Mediterranean area. Join EAAP and become member of the most exciting international animal science network and then have access to many services that are indispensible for every animal scientist worldwide.

THE 73rd EAAP ANNUAL MEETING WILL BE HELD IN PORTO (PORTUGAL) From the 5th to the 9th of September, 2022

The 73rd Annual Meeting of EAAP will be held in the fabulous city of Porto (classified as World Heritage by UNESCO in 1996) from September 5th to 9th, 2022. After 34 years, Portugal has the honour to host once more the annual meeting of EAAP.

This year we have 75 sessions, where more than 1400 submitted abstracts will be presented either in theatre or poster presentations!

During the meeting we will be discussing themes such as the societal challenges of animal production in a growing world, sustainability of livestock production systems, feeding the world and ensuring resource efficiency and sustainability, technology in animal production, mountain farming systems, adaptations to climate challenges, animal product quality and safety, amongst other hot topics. The program will cover all areas of animal science. This year Plenary Session will be dedicated to the coexistence of wildlife and animal farming, one of the most urgent matter for farmers. We will deal with the future techniques to handle the coexistence, the sanitary problems and the society acceptance of the coexistence.

The EAAP Annual Meeting is a privileged forum offering the opportunity for the application of new ideas in practice through many parallel sessions, a plenary meeting, poster presentations, and discussions about scientific achievements in livestock production all around the world.

All these activities make the EAAP one of the largest and most scientifically qualified animal science congresses in the world.

Apart from this outstanding scientific program, we will organize a vast and excellent social program throughout the week, starting with the welcome ceremony, an unforgettable Portuguese night, a gala dinner at the Palácio da Bolsa, as well as great technical tours and accompanying persons program.

The lead organizer is the Portuguese Association of Animal Science (APEZ), together with the Portuguese National Institute of Agriculture and Veterinary Research (INIAV) and with the patronage of the Ministry of Agriculture from the Portuguese Government.

Book your accommodation as soon as possible to ensure your presence!! Porto is a very cosmopolitan and desirable touristic destination and the conference will be held in high touristic season!
