# Errata

Maddux BA, Chan A, De Filippis EA, Mandarino LJ, Goldfine ID: IGF-binding protein-1 levels are related to insulin-mediated glucose disposal and are a potential serum marker of insulin resistance. *Diabetes Care* 29:1535–1537, 2006

The authors of the above-listed article have added Elena A. De Filippis, MD, as the third author. The correct citation appears above, and this change has been reflected online.

Johnson SL, Tierney EF, Onyemere KU, Tseng C-W, Safford MM, Karter AJ, Ferrara A, Duru OK, Brown AF, Narayan KMV, Thompson TJ, Herman WH: Who is tested for diabetic kidney disease and who initiates treatment? The Translating Research Into Action for Diabetes (TRIAD) study. *Diabetes Care* 29:1733–1738, 2006

A typographical error appears in the above-listed article. Fig. 1 describes the study population used for the cross-sectional analysis ( $n = 5,378$ ). This population is subdivided into two populations. The upper box is incorrect and should describe subjects *not* using ACE/ARB therapy and with no known diabetic kidney disease ( $n = 1,738$ ). The text on the same page describing the cross-sectional analysis is correct.
