Erratum

In the article by Munitz et al entitled "The inhibitory receptor IRp60 (CD300a) suppresses the effects of IL-5, GM-CSF, and eotaxin on human peripheral blood eosinophils," which appeared in the March 1, 2006, issue of *Blood* (Volume 107:1996-2003), 3 text labels at the bottom of Figure 2C were incorrect. The panel below contains the correct labels: IL-1β, IFN-γ, and IL-4.
